

1928

Wednesday

~~Tuesday~~ Feb 8

Today I noticed that the buds on the elms are noticeably smaller. For a couple of weeks the buds of the beeches have tinged the tree tops causing the light green of branches to appear almost white by contrast.

Feb 10.

Car showed me a letter from a man in Ill or Indiana who claims that woodcock are increasing there. He did not believe it was true, but said that he would have to put the statement in his file of data on increase of game birds. I asked him if he had a corresponding file for reports on decrease. He said no, that this custom had been started by Larzen and he apparently was not interested in reports of decrease.

So the same idea is being perpetuated.

Feb 14, 1928

Washington St

as I came out from the Dept about 5 P.M. The rain which had been falling heavily, had just ceased and the sun was shining below dark rolled clouds. With such a quantity of water on all the branches it was running down the limbs, and they seemed all coated with water. The low but bright sun on them made them look exactly as if coated with a thin film of ice, and was very beautiful.

Feb 19. Sunday.

Went up to K. in the late afternoon. Took a couple of Desmognathus fuscus and several spring frogs from the bottom of springs went to Scotts and had supper with them. Met Mrs Johnson an English lady who was staying with them a day or two.

Took the 7.30 car home from Jackson.

Feb 24. Friday

Baird club met at 3027.
Bartsch Henderson Fisher
Lincoln Kalmbach William
Eijneger Horrell Wetmore
Fuller Palmer Richmond.
Gutman Walker. Bell
Jackson

Starlings + Resolution regarding
swales, and talk on swales
by Palmer, The peculiar
form of shell that lays
bene eggs. were some of
the subjects.

Fritz Ulke was in the
office and told me that
some Dicranystylus viridescens
which he had had in
captivity for some time
came from a pool
near the gold-mine dump
near Bullneck.

March 4. Geover Tract.

Went with Mrs. P. in late afternoon down Tulare Valley. Considerable clearing of honey-suckle and undergrowth has been done during the winter. Saw nothing of special interest.

March 7, 1928. Went over to the Geover Tract in early evening. in hopes of hearing woodcock. but with no success. I found Barred Owl

March 11, Bullneck

Early, left camp in forenoon. We went down to the good frog spot where we found a few lots of eggs. Then up to the Reservoir. Here we saw two lots of *Ambystoma* near relation eggs, but could see none of the parents. A few woodfrog eggs there also.

Went down to Limer but found no nest at home. Found a painted turtle on the long pond at the foot of the hill above Limer colony. It dug out from beneath the ice.

Mar 12

Brody (with Mrs B) took me
up to Bullhead ^{meadows}, we put on
rubber boots and went to the
Reservoir. with flashlight
and lantern.

When we arrived into the place
we found lots of *Amphystoma*
of both series active, and
captured a good number.
The cluster of eggs of wood frog
had increased and we caught
a number. Also took a
few *Pseudacris* and *Hyla*
cruceator. It was nearly one
o'clock when we got ready to
leave for home.

March 18 (Sunday) Scott Run + Bullneck Vc
Went upon 11³⁰ Got off at Belaffa
and went back to Scott Run above
the Trolley Line in the grown up marshy
meadows soon put up 2 woodcocks,
and a little later another. About
2 inches of snow on ground
a pair of Red sh. Hawks calling
a little. Many crows C. Nuthatch
1 Rabbit in heavy woods on Hill
Fox sh. many Robins + Bluebirds
a Goldfinch quite bright Song
Sparrows + Grackles.

Went across thorny woods past
Belaffa + to Woodhouse, and
thence to Bullneck. Stayed at
Cabin a while then went on
to Scott. and home by 6²⁵

A great many Woodpecker eggs
in Scott Run valley and other places
Pseudacris by hundreds calling
and some Peepers heard in
Rana sylvatica

Cattails Bullneck near the
fallen oak

March 23.

Blossoms of elms in Parks
are well out today

March 25 Sunday,

We all went up to the "Farm" in the afternoon.

I changed the ~~site~~ ^{location} of my blueberry to the pond site. There was a great mass of woodfrog eggs in the larger pool, and I moved some of them to others. Heard a few woodfrogs creating a great many *Pseudacris* breeding and took a number for Min. Cochran.

March 31. To Falls Church (evening)

Bill & I took J.H. Riley up to his home after office, and we drove out to a place where he said there used to be a good many woodcock. It was on the upper part of Holmes Run. The evening was cold and we heard none. Many *Pseudacris* and *Hyla* crucifer were singing. Some of the feathers of a ruffed grouse that had evidently been killed by some predator. I saw the long soft catkins of hazel fully developed.

April 9, 1928 Washington

The flowers of the shrub
whose buds have been daily expanding,
opened today - and the leaves of
the chestnut oaks were visible.
For some days the tulips have
been showing green.

Elm leaves are almost
showing.

In some of the warmer streets
the tulips and elms buds
have progressed to a point where
they cast a little shade.

April 10.

This morning the leaves
of the elms and the Norway
maples are showing well.

Sunday, April 15 To Bullneck

Dr & Mrs Harper and Evelyn, Eva
& I went up to the shade about noon
Had lunch and then The H's & I went
over to Prospect with Redbud fair
some dogwoods just showing

Sat April 21 Washington.

Leaves of Sycamore started.
Some poplars well out. Several
warmer days the past week
have forced the leaves along
in spite of frosts on one
or two nights, and cool
days put off the buds

Sunday May 13 To. K.

Mattie York Preble and her sister
Ernie were in town. In the afternoon
we took Mattie (Ernie was ill)
up to the place. As she had
changed her plans and had
to get back sooner than we
expected we could stay only
a few minutes. The pansy
violet and the Azalea were
out and I gave Mattie
some plants of the violet.

Thursday May 17. To Fort Foote

McIntee and I went on the usual spring bird census. Met him at Wisconsin & Mass. Ave. at 3³⁰ and we drove down to near Fort Foote Md. Parked at a truck garden worked by a man named Hingeford. The day was cloudy until noon and partly so afterward. We found almost no migrants, and made only a poor record, about 65 species.

After we had about exhausted the country we drove across to near Silver Hill, Md., where Mac had found a large number of pink lady slippers. We found a great quantity in pine woods on either side of the road.

Monday May 28

Left Wash D.C. at 5 P.M.
for Albany to assist
in judging traps for
the Am. Humane Assoc.
and the Nat. Assoc. of the
Four Industries. at request
of Dr. Coleman and Arthur
Pack asked me to go and
paying expenses. Dr. P.
first willing to pay me
my time but after a con-
ference decided that it
would then become
involved officially and
asked me to go on my own
time as I had proposed
first. It is thus purely
a nature association trip
left Wash. at 5 P.M. Sat.
and was across to N.Y.
in bus on Fri.
Left N.Y. 11:45 for Albany

Tuesday May 24

Went to Humane Association
at 80 Howard St. Where
Mr. Slautterback of the Pan
Am. Commission had
just arrived. He was from
the Pan Am Association was
in hand, and he was
Sunderson played a C.
Bishop of the NY State News.
I sat on the committee
for the Pan Am Association.
All had about 1000
dollars in my person
some seat traps many
models, and some
of the very crude.
The first animal was
given to a gentleman
who had had been
fed in such a way as
to make it a point
after changing without
properly digesting
lighter.
Then to a piece of
the book. I asked
that he be ~~trapped~~ trapped
either by a platform
or by bait trigger and
will also catch more than one
animal after a while.

Went to the house
Calamagrostis was out
to the garden. The
Horn was in. But the
house was empty
from the garden. The
house was empty and
one person. The dog
was going to the property
of the house.

The new and the old
the new and the old
the new and the old
the new and the old
the new and the old
the new and the old
the new and the old
the new and the old
the new and the old
the new and the old

Went to the house
Saw the
Cross
Kingshead

wed. May 30 1928

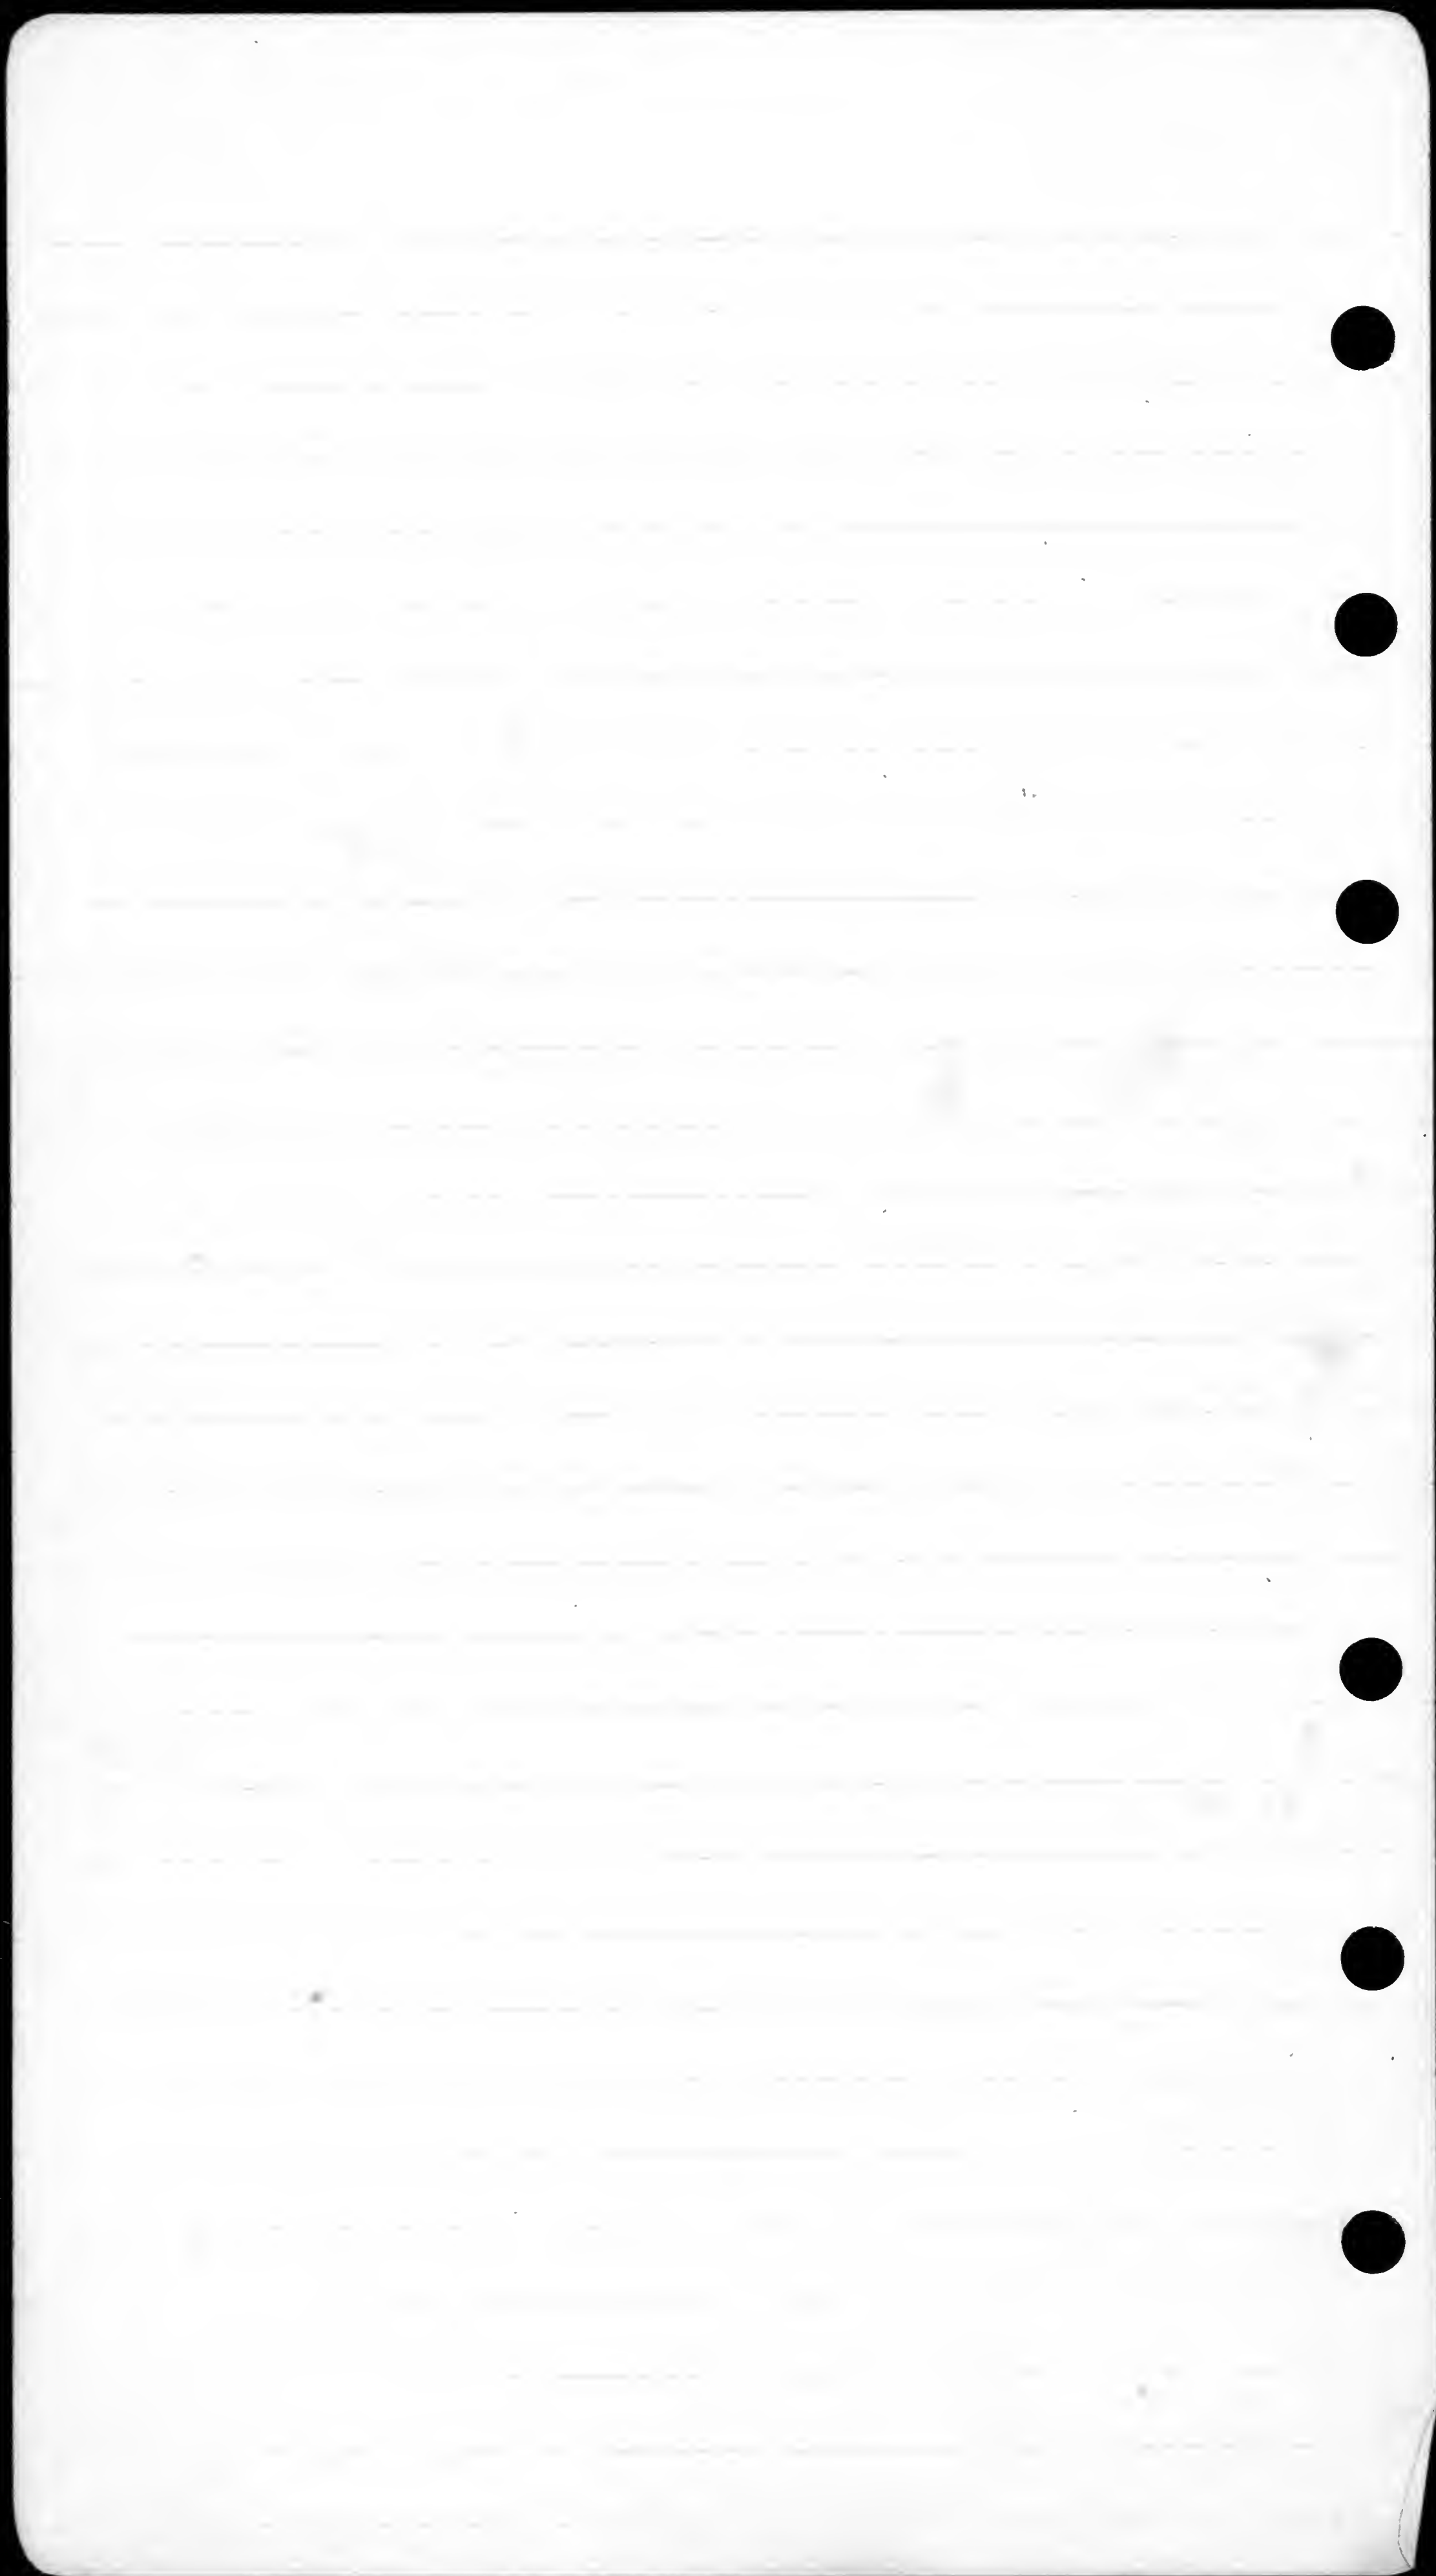

In the morning we went to
the Museum where Dr Adams
and Sec. Bishop met us
and took us over the
most interesting parts of
the exhibits of special
interest were the collection
of birds' eggs. those of procelles,
every species in the N.Y.
list being included
The Ethnological group were
very fine. the figures were
largely made from actual
casts of the features and
forms of New York represent
atives of the various tribes
an exhibit of fossil tree
branches in a group whose
background represented the
tree in life, was very
realistic

June 10. 1978.

Bill Evelyn, myself & the Fedder went out about 1 o'clock. We drove up past the farm and to Great Falls where they right-seed a while. Then we went on up past Forestville and Dranesville, and within 11 miles of Leesburg. As the road was bad and getting worse, we turned west to Herndon, and then out to the main park and came back by way of Arlington.

Stopped awhile at Hoover Field and watched some flying.

12. 1. 1. 1. 1.

July 20, 1917, T. Salmon
Left home about 10 AM
and went to Salmon
The fall is very low
It is a very dry season

Left about 10 AM
and went to Salmon
The fall is very low

Left about 10 AM
and went to Salmon
The fall is very low

Thence to Flemington N.J.
The only hotel and place
we had was the Green Room
point. The hotel had
some one room on a corner
across the hall from
so we went all together
again.

17 July 22

Flamington to Hillsdale NY.

we were up early and
changed our train. The
road became flat in the night
and we got it reduced
at that time. We were
tired after a long day.
Shortly after 8 (Standard Time)
went on at a good pace
and ran on the
Stonkney road. After
crossing the Mt. Wadsworth
Tunnel we decided
we had best avoid
the Green Mountains
country. There has
said to be an epidemic
of black measles.
So we turned north
from America and
went on to Hillsdale NY.
Stopped at a hotel there
in a heavy rain.

18 July 28

Had a letter from H.B. about
the money from the account

He says that he has
written to Frank about
the Remington and
Maggie's. The account
to the bank is now
in the name of H.B. and
L. and the money is
for the bank. It is
there.

We are going to
all the places and
the people are all
coming. It is really
great.

We are going to the
house in the north - the
big house. It is
now in the north.

During the week, was
in the house.

It is a house.

It is a house. I promised
to go to some place
Maggie's (Sant)

July 24.

Charlestown to Osage

Left at 8:15

Left Charlestown

Went through
Charlestown, Franklin, Peoria
and stopped for lunch beyond
Peoria

Went on to the house
about 10 miles

In the morning we heard
Whippoorwill
Horned Lark

Apr 25

Left at 10:00 AM
for the ...

Strong ...
to ...

Ossipee Mt

July 26. In the early afternoon
A.B. I went over through
Bean's woods and up by McKenna's
thence home by Alfred's

We saw nothing of special
interest except the crowdock

In the afternoon later we
all went up on the hill
to the upper pasture to get
some blueberries. Got a fine
lot and got home well
before dark

James

Hermit (singing)

white-throat (singing)

gray woodpecker

Friday July 27

AB and I went fishing on
Beck's River we each got
about a half dozen good
ones, and some shiners.

We also caught many small
dace which clamp to the
bait until pulled in

I heard Hermit and
Yerry (call note)

Saturday July 28

Rainy. Stayed at home.
The house in the forenoon.
In the afternoon A.B. & I
drove out to Mount Saffingham
and got a lot of wood chips
and then up to Mount Saffingham
where we got some dill.
Saw Blepharoglossus in the
on plains also Callisaurus

Sunday July 29

We all drove up to
Echo Lake near White Horse
Ledge

- 13 At lunch above Chocoma
- " 14 White Horse Ledge
- " 15 Jane, Margot & the Fadder
- " 16 Diana's Baths

Monday Jan 20

We decided to go up
to the top of the mountain. It was
got a very good chance
to get some good gold
specimens will before noon
after a short rest. It was
in the forest and we did
not catch any water.
He was about to the base
of the mountain. The
altitude 3300 ft. We all
camped close to the station.
A. B. got some good
specimens. The
specimens were
Mastomys
Sorex fuscus

White throat party at camp
at the evening and
never or get the all
night. About 11:30

The next morning A. B. took
Zapus hudsonianus
Mastomys
Peromyscus
Sorex personatus

Tuesday July 31.

We were up early and
after breakfast got into
a climb to Mt. Ararat. There
was a horse and a mule
went by the trail. The
altitude, Grindel, and the
city, I am, we were nearly
at the start and the
train passed us just the
halfway. There were
very few birds seen
and while birds being
the most conspicuous
the flowers were pretty
well gone. But we found
on the summit a few
Mt Ararat. *Houstonia*,
Potentilla tricuspidata etc.
The cranberry in fruit
corolla same as in
fruit at base but in
flower at once above
climberline.

The day was hazy at
first but before we
left the summit about
1 o'clock it had become
clear. We went
by way of the Alpine
Garden and back to the
climberline and down the

Ammer road back. Then
as we went further along
when the truck leaves
Tasmanian. It was a
valley made half down
a very steep slope

Had a good dinner
The team went all
the way back with
AB

The rest of us got back
about 5.15 and left at
5.30. Made good time
to near Chertown where
we had to trouble
and did not get back
until about 10.30

Whiffawell calling about
8.30 near West Osage

Wednesday August 1

Did nothing of importance
as it rained.

Thursday Aug 2

17) Pines on hillside

18) opposite house

Went on to the hill
and looked
no change in the
mattress etc. but family
equipped camp wood-
working and metal working
- furniture and everything
in place. saw a
camp for parents also
a small creek up to Fitts
Museum but it was closed
Went on to Nelson and
back and home by the
Columbia Road

Friday Dec 13
overcast - 2000 ft. - 2000 ft.
afternoon - 2000 ft. - 2000 ft.
at 2000 ft. - 2000 ft.
up - 2000 ft. - 2000 ft.
down - 2000 ft. - 2000 ft.

25 Jane Margot and the Pedder
nearly sunset

In the afternoon
Mr & Mrs Frank Buxton
accompanied by a friend
was Mr. Buxton of Ky-
came in and visited
for an hour or so. They
had to return in the
morning so we could
only talk over old times
and congenial subjects.

Mrs Buxton told me of
peculiar gentlemen that
guest out beyond
the Sam Hoffmann
that she has transplanted.

Monday August 6.

we got up rather late
and were kept in the
house all day by rain.
In the late P.M. went
out to the depot to market
and drove down to
Effingham afterwards.

Tuesday Aug 7

It was still raining in the
forenoon. In the afternoon
the clouds cleared away
and at 4 P.M. went down to Fresh
they were away and we went
down to the lower field. Picked
a few plants.

Spiraea salicifolia
" *tomentosa*

both in height of blooming
in the pasture field on Fresh
lower flat.

Wednesday to Province Lake

Left at 11:30 got to 12:30. Arrived
Couch and I started for
Province Lake. Went down to
Wakefield by way of Beecher
Pond and Beaver Pond. It
is a back road. We found
at Beaver Pond a lake with
very shallow water with
much grass. We went
down to the lake. Then went
on to Ephraim Center
& Falls. At last made
it. We found the Horvath
had moved. The Sabines
and back home by E Falls
and the Center. (Saw a pair of E. in
the bush 3 eggs)

Capnoides superciliosa

Saw a type between Ephraim
Center and E Falls. It
leaped across the road on
a pony track about 50
yards ahead.

Spotted Sandpiper at P Lake
Before supper I saw an
Aphid's place a couple
of dozen night hawks
fly by eastward. Several
times they made the
hissing swoop
on summer.

as if
with
puck

Martin. *Parusoides yagoua* nest

Thursday August 9.

To Dauphin Park
we drove up to Danholm
and deep into Redwood Park
Then down the trail to the outlet

of Big Danholm.

I saw some brook trout below
dam

In woods Salix (still in bloom)
Trillium (in fruit)

In the afternoon we walked around
by the Brownell Pond. A.B. Mus. P.
+ myself saw large beds
of pink lady's slipper long out
of bloom.

Some woodpeckers, 2 chimney swifts
flocking but did not find
where they roosted.

Took pictures of young pines etc
a great many barn swallows
still about in flocks

37 (Aug 8) Stamp.

38 Aug 9. Pine on Seale
Hill near Dodge House

Friday, Aug 10. To Bennett Hill
The Hornies & I went up on the
hill in the forenoon after berries
and got about 8 quarts
I came home by the Hanson Road, and
got a piece of the best fungus
I photographed. It fell from
large beech near 4 corners.

Librarian, Center Ossipee
Library
Rev Frank H Baker

Robin on hill
Juncos with young on hill
Hornet Thrush singing
Song Sparrow

In the late afternoon we went
to the Center then to West
Ossipee, where we had some
ice cream. Then up to Thucoria
Saw Aunt Fella & Leavell, and
bought some pictures

Saturday August 11
Mr H took me to the depot and
Mouthville. I called Charles
L Connor who is about 92 years
old. He is rather hard of hearing
and somewhat feeble, but his
mind was clear. He recalled that
years ago his son Ed had taken
around the square, and that I had
later done the same for a reward.
He did not know who had made
the best time. He told me about
his father settling near Connor
Pond 107 years ago and built a
log house. They came from near
Wakarusa.

Thomas Blake and Sam Abbott
(Abner Abbott's grandfather) built
a camp and cut and hauled logs
one winter back of Pearley
Connor's house ~~one winter~~

Stephen Jackson worked a mill
(B P Connor worked in mill)
Among his ^{older} brothers were
W B John, Jeremiah

Sales? James L Bodge had a mill
at the head of Danhole Pond
Lived at the old Hanson Place
near Roland Park

Charles Connor was station
agent at Center Ossipee 1872-1880
In 1883 was appointed in charge of
Committee to divide the Northern
Estate. The distribution was done by
W.B. & Charles Connor.

He told me in part the story of
how his father scared the bear
which he encountered late one
night by beating on the drum
which he had used at a dance.

Dr. H. H. Hoxson told me that the
first road through the country
was built from Waiparua to
Sawney. It went from Tracks
Hill to Ossipee then E. of Green
Mt. & crossed Ossipee River
just below the outlet of the
Lake. Much of this road still in use.
Duncan Lake was named for
Duncan McNorton one of the
early settlers about Ossipee.

From History of Cornwall Co
by George Spaw Merrill (Editor)

Ossipee supposed to be from
Kassappa. derivation not certain
may be from Pine River. Water
bordered by extensive zone of
fines. or "Water spread out"
probably referring to the broad
lake.

I discovered at outlet of Duckhole
Pond in 1881.

Pedunculate buried then dead in
the Indian mound south of
Cornwall River. This has been
investigated and has been
verified up in Granite State News
date 1

Benjamin Peble lived on
the road from Coopers Corner
to Dimons Corner.
agent of the Fall 1882 he
was assessed for 1 poll,
1 horse, 2 cows, 6 yearlings,
5 acres mowing, 1 acre tillage
6 acres pasturing 68 a. wild land.

Fall of 1802

J. Gaskineth Jr 1 fall, 1 horse
4 oxen, 2 cows, one 3-yr old
1 acre tillage 5 mowing
4 pasturing 59 wild land.

John Gaskineth - 1 fall
1 horse, 1 cow, 1 acre tillage
4 mowing 4 pasturing 60 wild land.

Dr (Lincoln?) McVicker a physician
practices in Sandwich until 1800
Then removed to Dimoria Corner
Died very old according to
tradition 117 years about 1830
(Sandwich in 1800 had five
times the population that it
now has. D. Holston)

Dr. Holston tells me that
Signs of beaver seen near Archers
ledge and near Brownells in
1927

Fresh heard of deer about 1880

Wood ducks used to be common
about Sandwich

A megalanese is rather common
in autumn

Blue-wing teal rather common at
times

Canada Geese of regular occurrence
in fall & have been seen on Pine River

Loons still on Ossipee Lake each
summer

moose

George Emerson, saw moose,
a bull, cow & calf near Pine
River about 12 years ago Tracks
are seen every little while

A moose seen at Mountmorille
fall of
1927

1 shot recently on Fryeburg

a track on the Mt near Brownells
about 2 years ago

2111 Leon

Sunday August 12

It was a fine day. We did not go anywhere in particular. Alfred came back from Vermont last night and was down today. We went out to the Ironquand and took down the ~~fruiting~~ from the ground. Some of the names are listed.

In a weeping birch the 4th Sapsuckers had a "sap orchard" and three of them including a young one for the year, and an adult male were busily working at the holes some times within a few inches of each other. A Hummer was also interested in the holes and kept coming to them evidently for the insects in the holes. The woodpeckers resented the visits and repeatedly made threatening movements as he approached when he would dodge back.

Monday August 13

The Hornells left
between 8 & 9 o'clock
for Portland on the
way home

Alfred took me up to
the depot for provisions.
Later in the forenoon we
went over to Water Village
to see Mrs Eva Pratt.
Found her well, and had
a pleasant visit. Then we
went to the Lower Beech
Pond, a deep forest-
bordered pond rather high
in the hills.

We then went down to
Ossipee and had some
lunch there. Then by the
"Plain road" to Pine River
Bridge near the south side
of Green Mountain. Then
along the southern bank
past the home of Ben
Brownell, who raised
hens up by the gulch.
We found him getting an
hay from a distant
meadow. He says the
Whites lived near his
old place before they
went there.

He traps some still and
several years ago caught a
lynx and about 2 or 3 years
ago another. Caught
corns numerous, a few
mice & foxes.

A bear was killed on
Green Mountain last fall.

Tuesday Aug 14

Alfred and I got Charles Conner
and took him up to the old Conner
Place near Conner Pond, where he
was born in 1836. Passed the
graveyard where W.B. Conner is
buried.

2 Old Conner House & C Conner
He was born here 92 years ago

3 Barn built at same time as
house.

4 Barn -

5 House

6 House -

7 Conner Pond

9 " "

10 Outlet Conner Pond

11 Site of Live Oak Mill

12 Buried in Graveyard
on way to Conner Pond

we went by the road surveyed
by W.B. Conner arrived by chance
Past the nose Tibbitts place
His wife was a sister
to Charles Conner's mother
(2 miles)

Ezra Eldridge place

about 3 miles

nearer,

4 miles from the pond
at Moultonville, where we
left the main road we
crossed Lawrence's River.
Just below the bridge
is the site of Levi Perkins
Mill where all the Conners
worked more or less
A short distance above is
the farm cleared by Peaslee
Conner in 1821 and later
He lived at first in a log
house beside the river but
about 1824 built the large
house and barn, still occupied
When he came Peaslee Conner
had several boys born
at Wakefield N.H.

2 or 3 years

Besides Wellman B Conner
who was born in Wakefield
1813 then went to John
and Jeremiah who must
have been not far from
the same age. Peasley Conner
Charles Conner and other
children were born in
the big house. When
Charles was eight years
old the big house was sold
to Jeremiah who was so
prosperous the oldest boy
and had married, and
Peasley went back (north)
a mile or so and built
another log house, and
cleared another farm

Wednesday Aug 15

In the forenoon we went
out to the station

Had lunch at the house

Then went down to Archers
Road and caught three
Pomarine Petrels for Hopley
They were smaller than
last year.

Had supper at the house and
then walked through the
corn field to the bottom of
up to the farm from near
Archers where the had
hidden away

Hermit Thrushes still
singing about Archers
Road

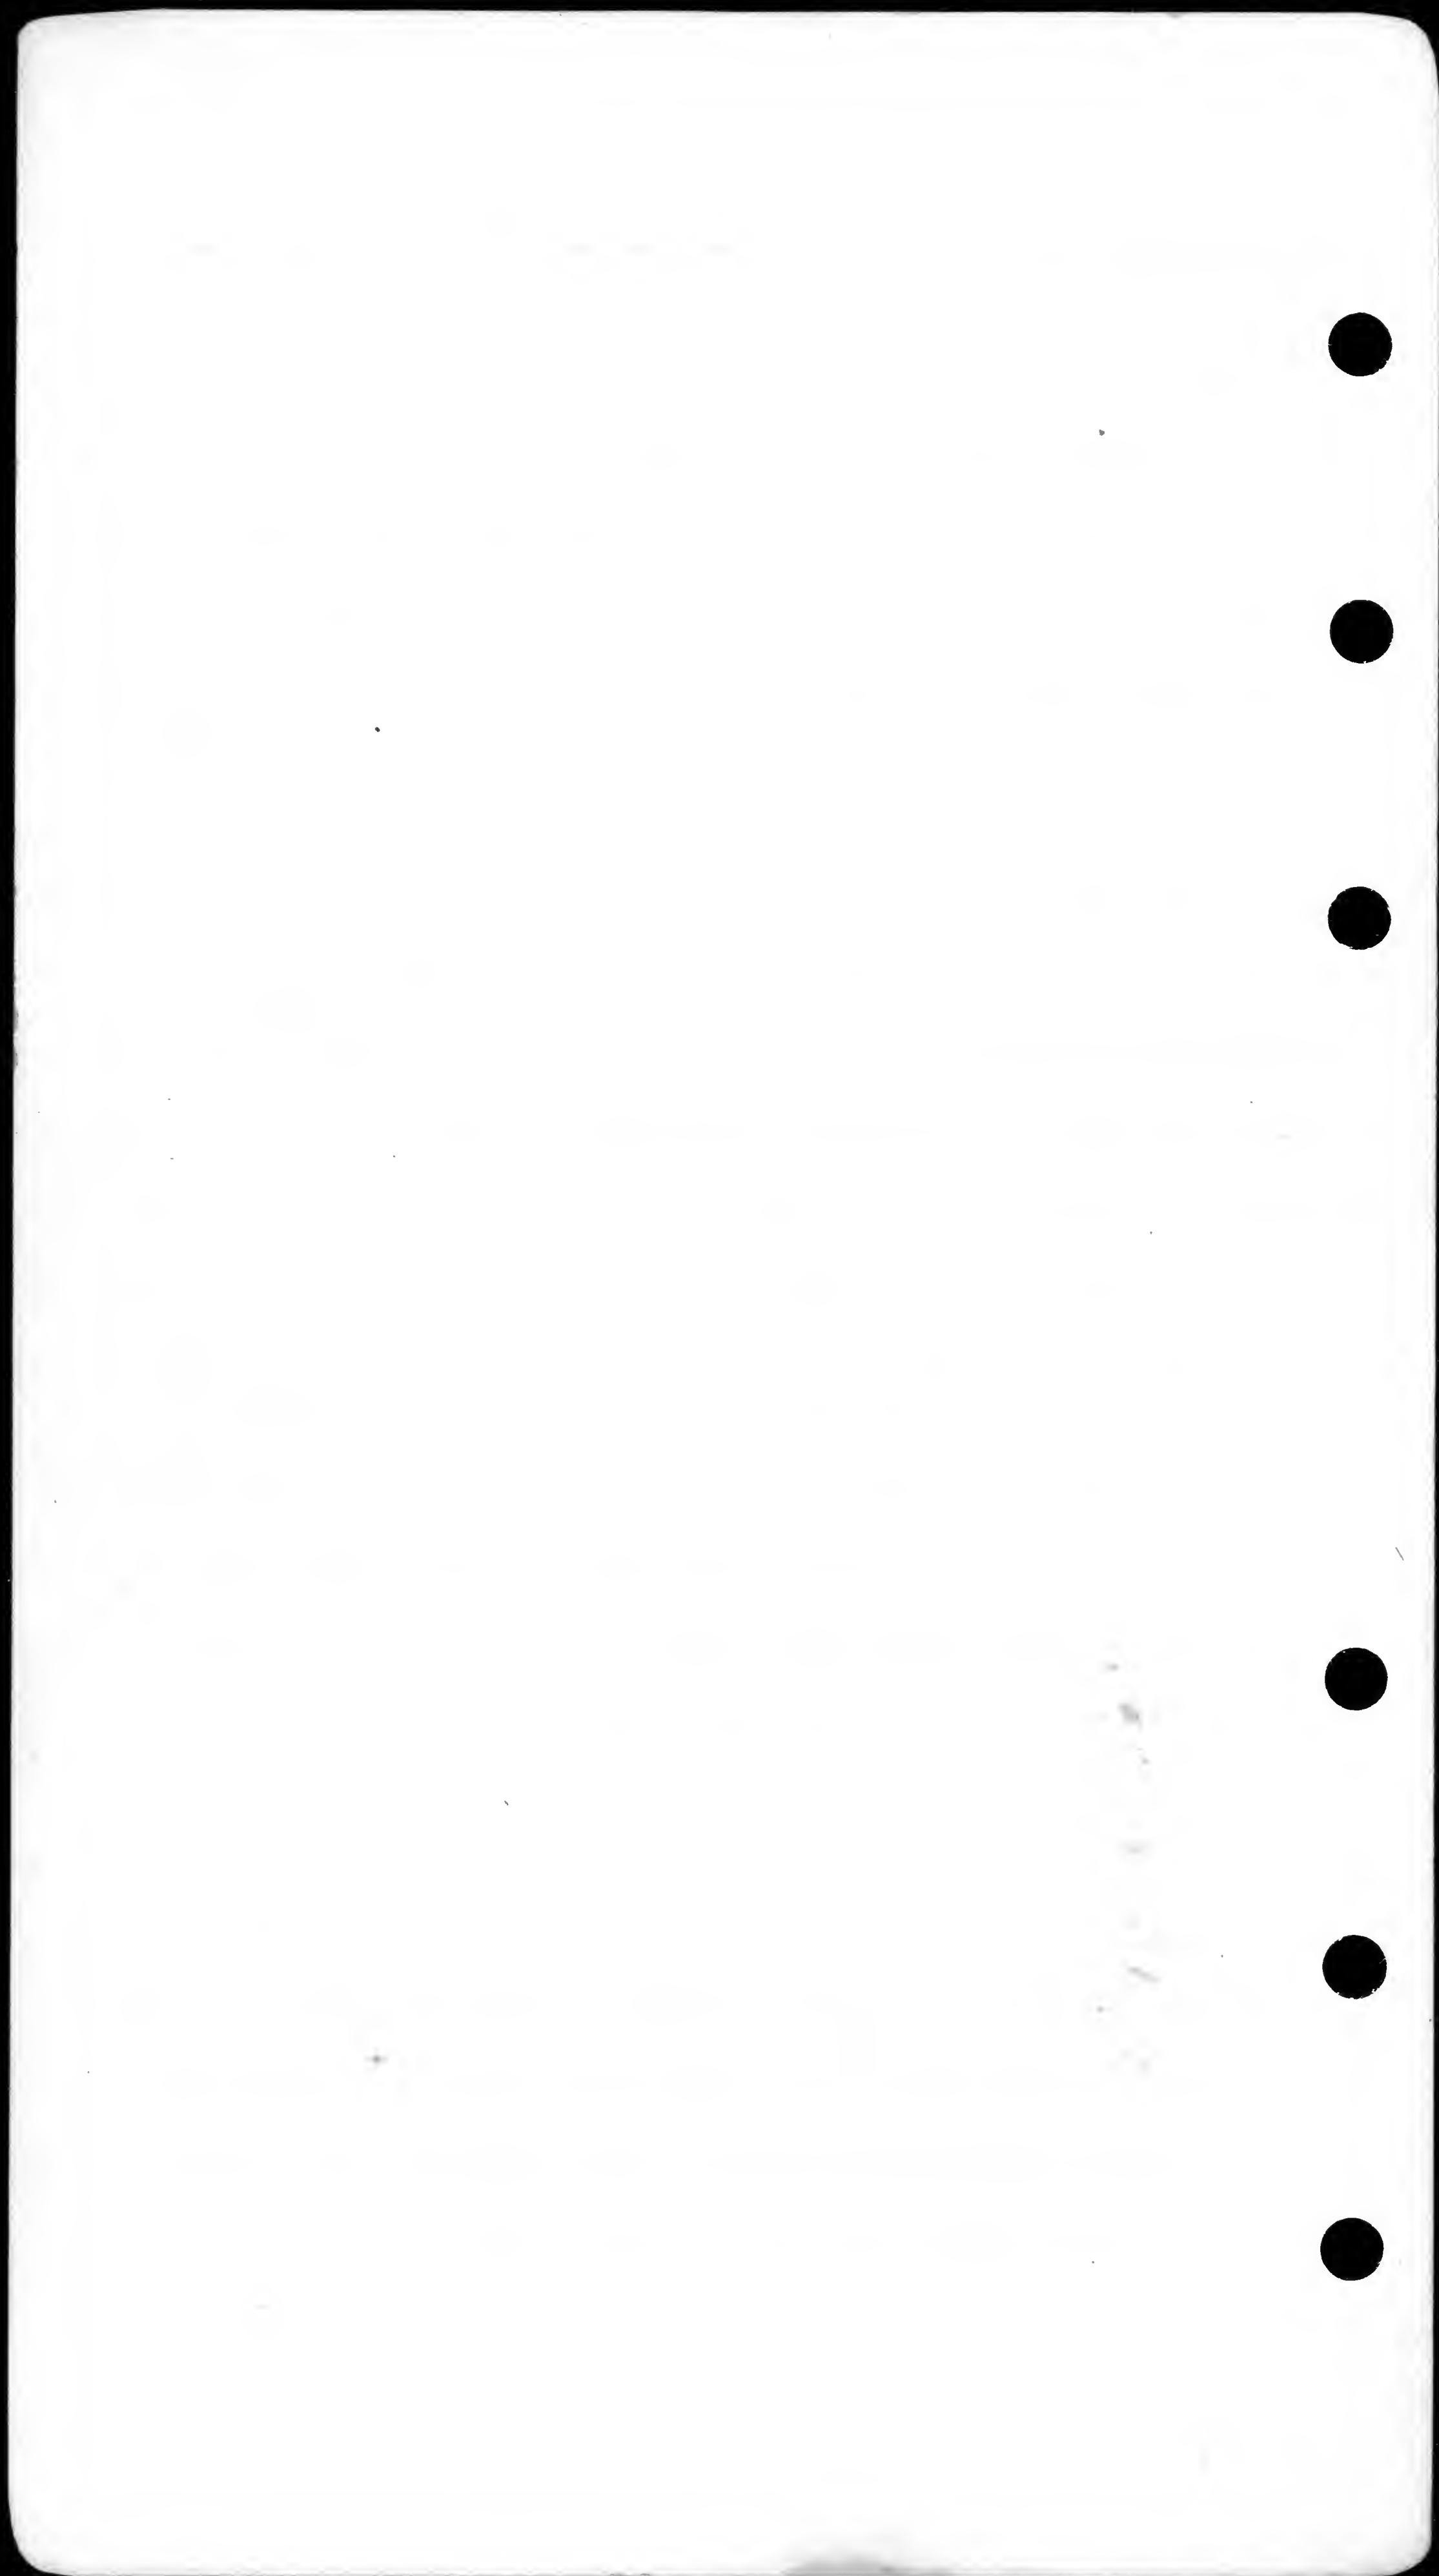

19. branches with cones

Thursday Aug 16 warmer

In the forenoon I took some
pictures about the house
and packed up

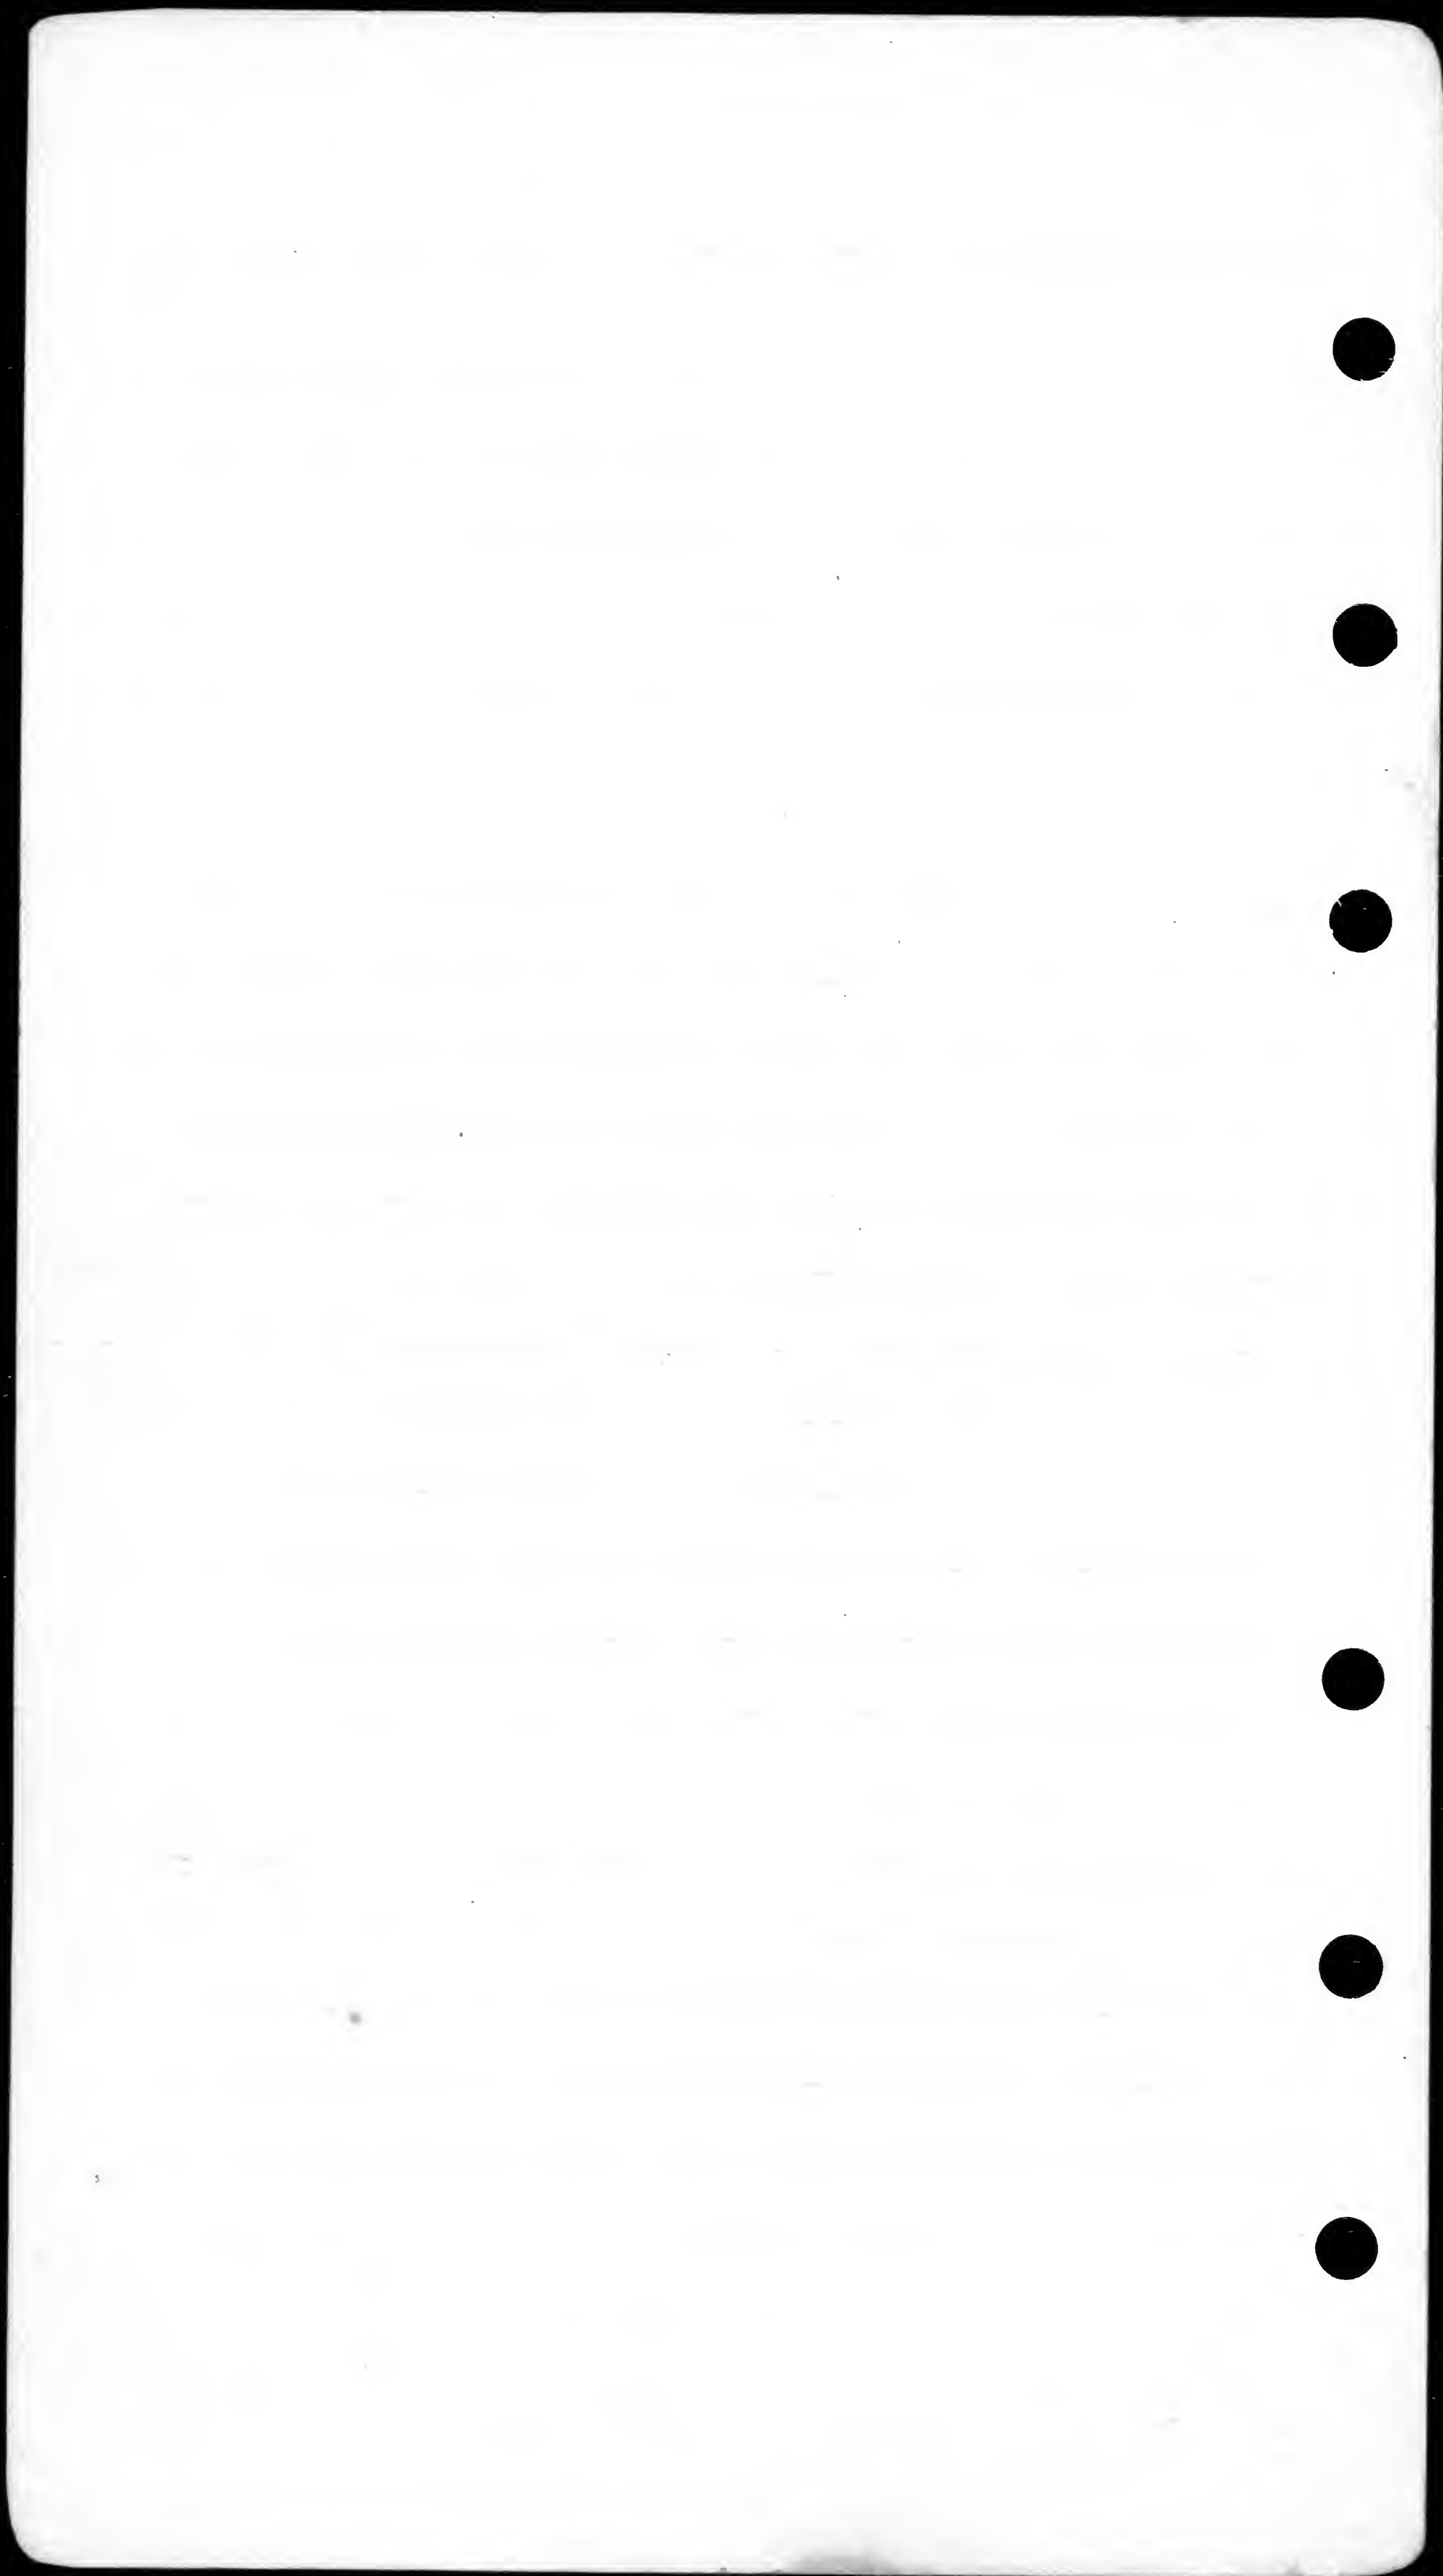

packed both our baggage
up to the station and
shipped trunk, crate
and cartons (to Harper)

Left for Monday and
went up to the branch
stopped at Mountrose
where we saw Bear
Hollow Lodge and some
other

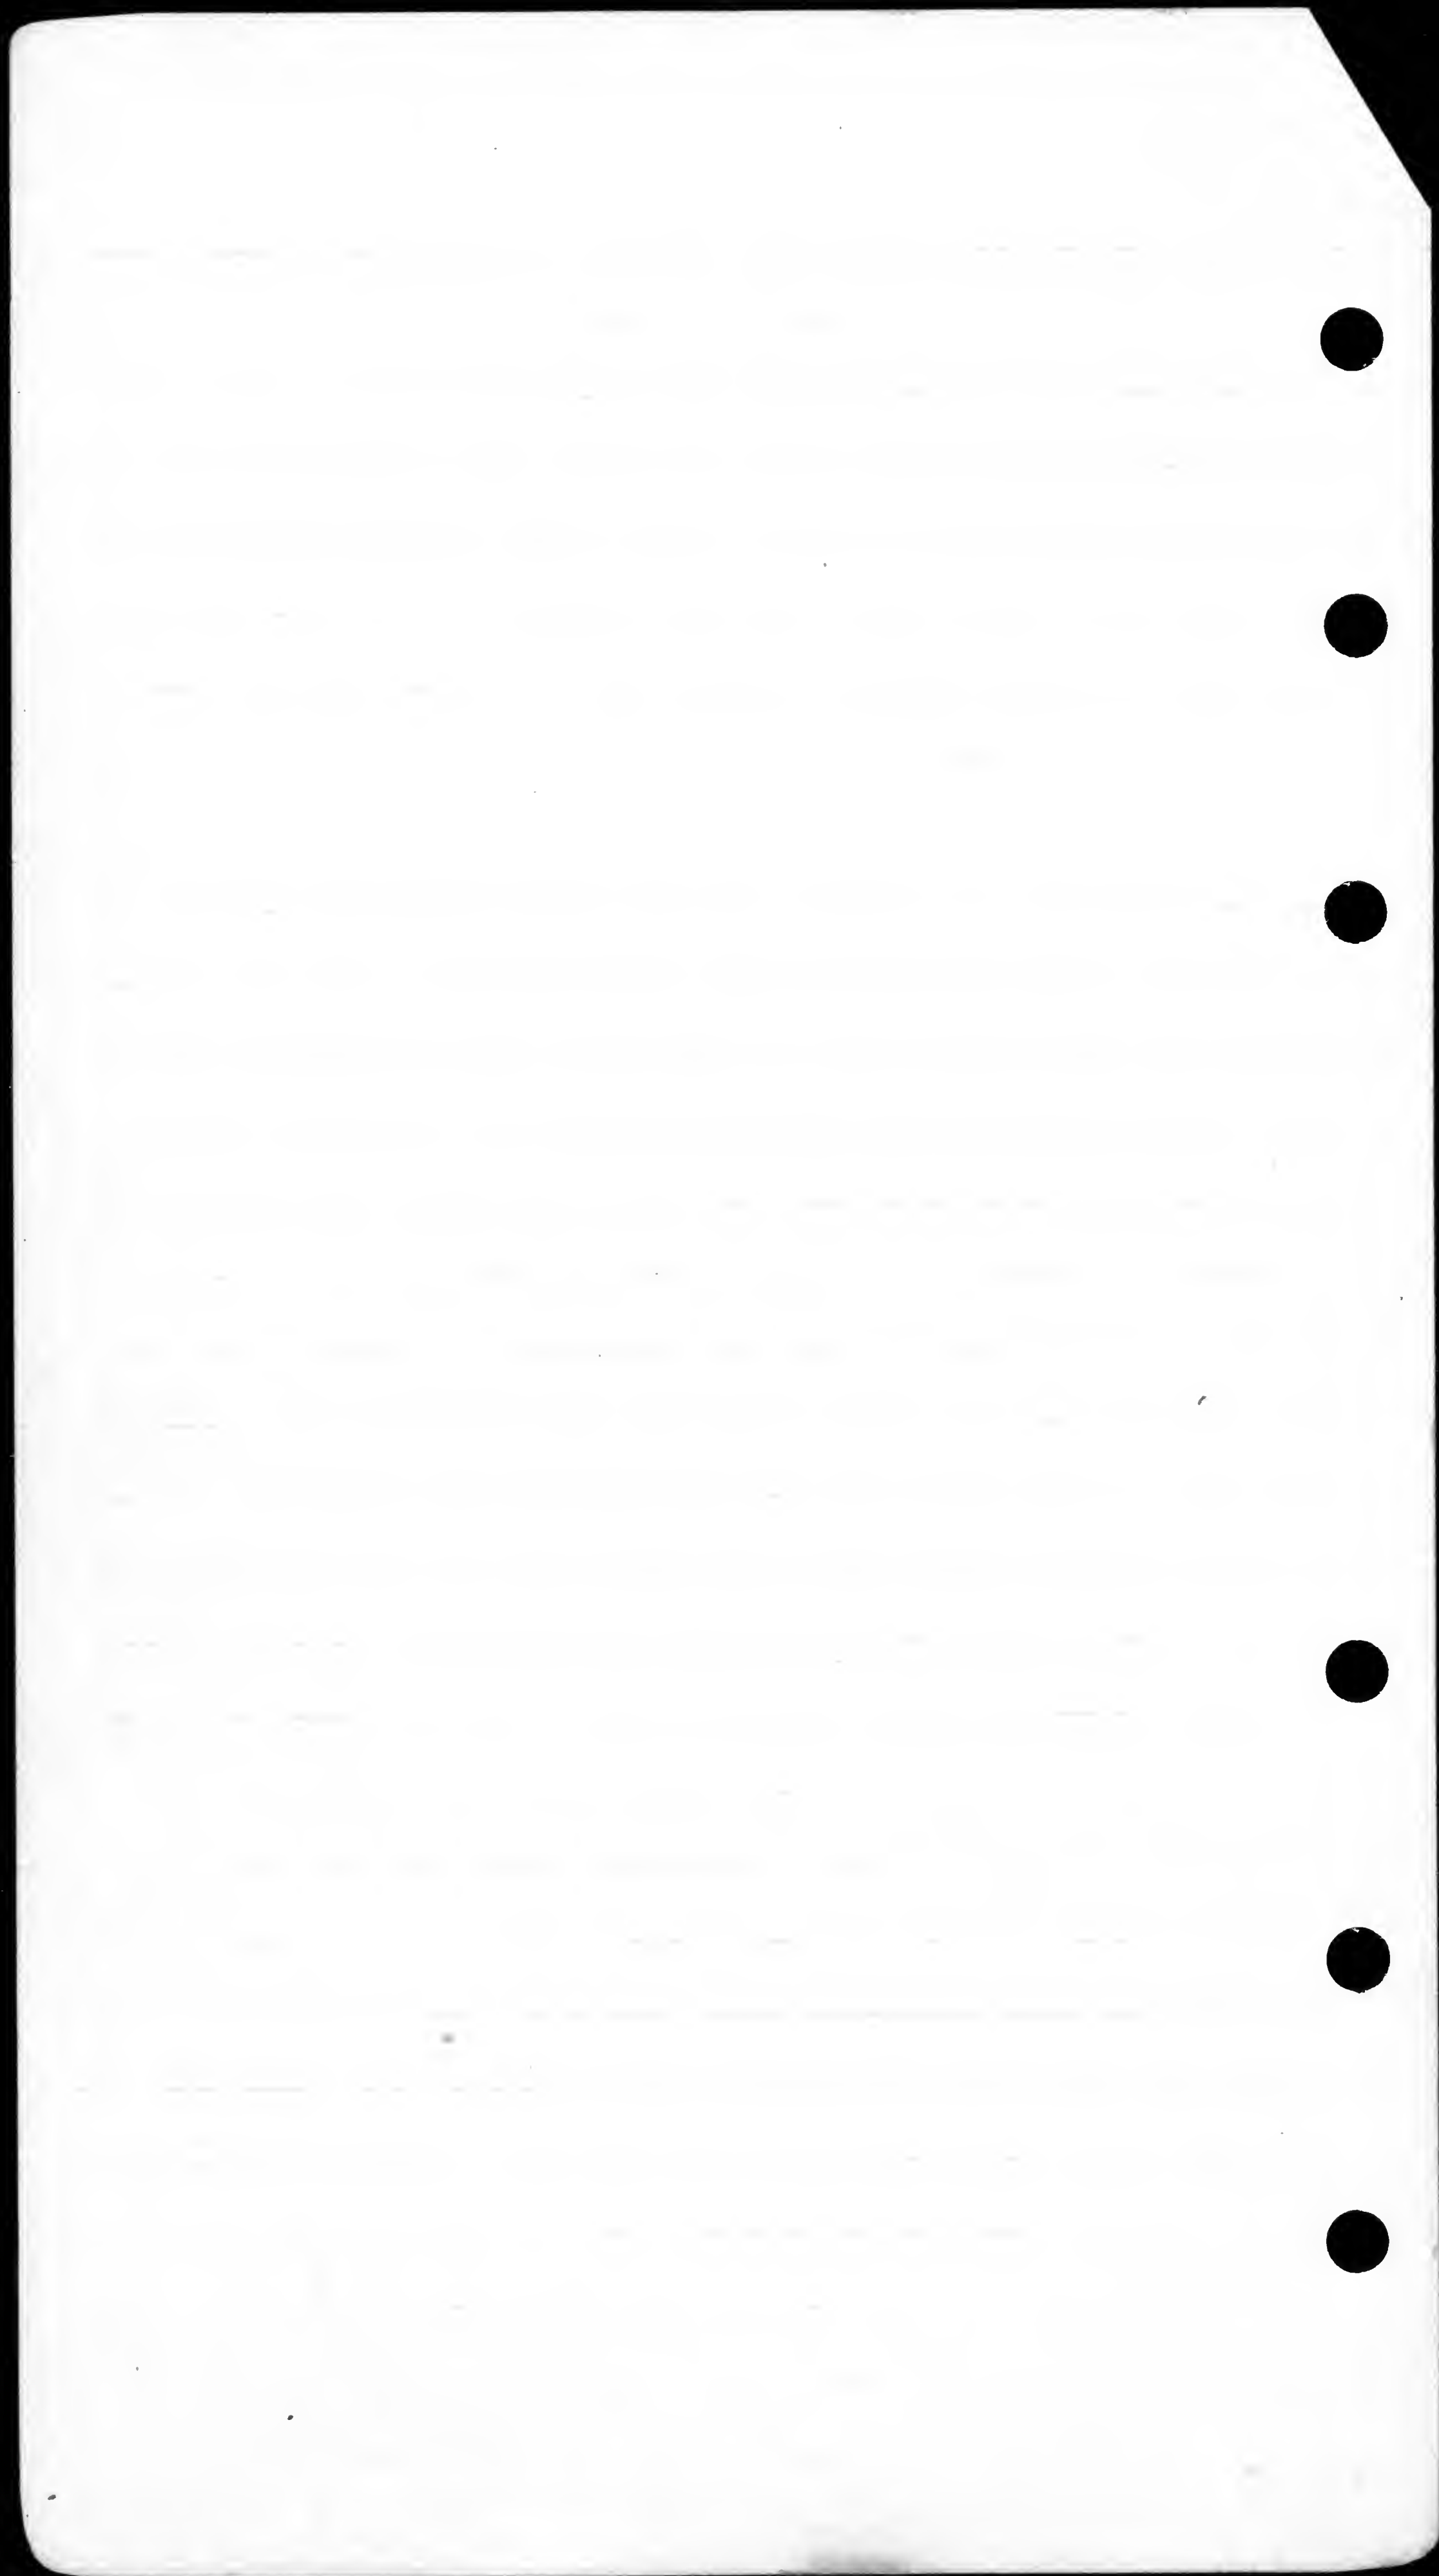

Stopped at the Almon Hotel
where we looked over
a lot of plants

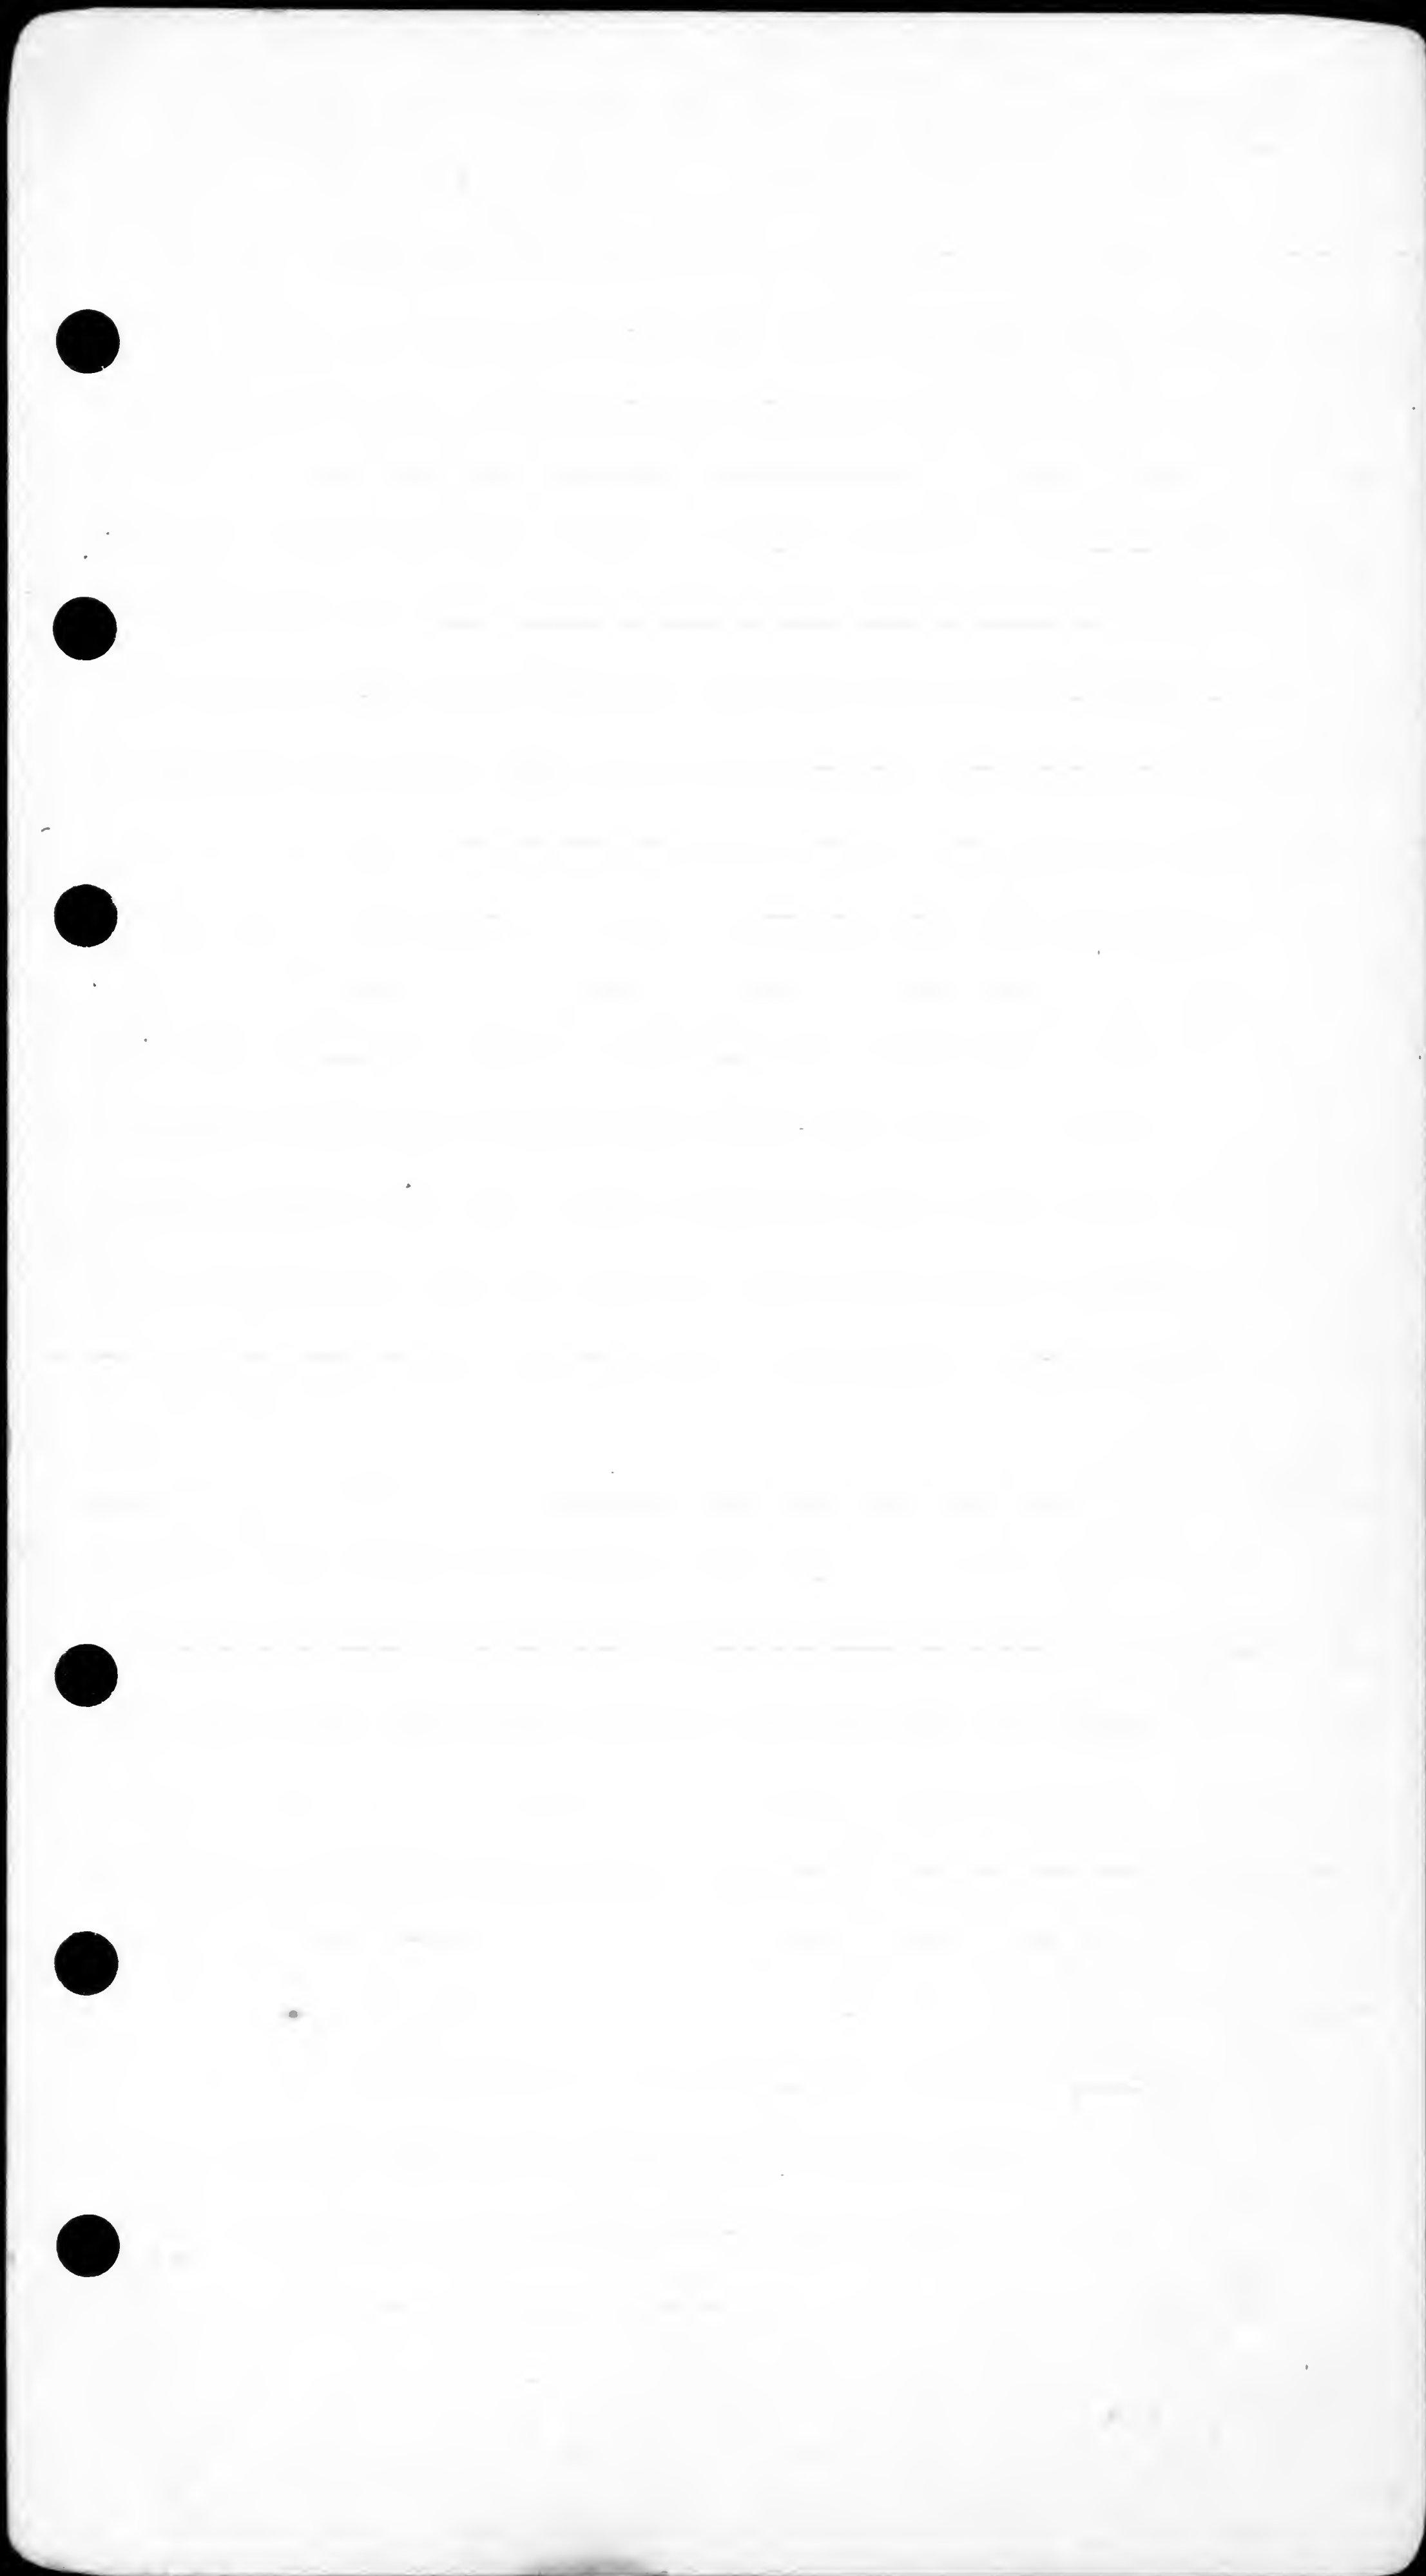

Photos

With love to all

Wed Aug 18 - Wednesday

Met Mr. Brown, Public Library,

in charge of

Mr.

Mr.

6

Then I met a young girl who was
reading magazine to her

She would like to be
an assistant. I very

much like her and I

will talk with her
and see if I can find
a place for her.

Later in the afternoon
I received a letter from
Mr. Brown, stating to
me that he had
and I will try to get
a place for her.

Plan and Survey of the
R.R. Station, H.S. Station
April 1836

The following is a plan
of the station and the
road leading to it.

Survey of the road leading to the
station, and the station itself.

Every 1000 a Tree

at 10:30 am. I collected 11
specimens, which were
by 10:45 am. I passed off the paper
to the land steward. These
birds are all from the
ground level. I have
found 11 specimens.

Found pair of 2 shillings
paid for Mark Valls
in the house.

Perhaps all were not
collected. Taken in the house
only.

Tails - 100 paid

House 100 to 200 in 1000
and 1000 in 1000 (1000, 1000)

In the house 100 in 1000
1000 in 1000 to 1000.

Sunday Aug 19 Did not
get up very early
Woke up at 10:30 a little
after a shower shower
had dinner then down to
Lynne to see John Page
they were with
her then down to
some of the beaches
then to the beach at
Crescent Hill we had
a picnic on way of home

Went to Westport Falls
and walked the town
square, that overlooks
the river and the
surrounding country
The town is Westport
a small village in Boston
the town is very dark
the streets are dark and
a look the town to
the north

I plan to go to
Providence to visit
John and Ruth and
the children

not to be offhand in manner. I know
not to go to law with one. I know
we command to keep our tongues as with
a bridle, not to speak evil of one another,
more of those who are evil than of well qualified
with no man - well informed. From the bear-
ing, and back-biting, will not wed in
much to and profound conversation, well
Heard. I know. I know. I know. I know.
Not to
regard with ill-will. I know.
I know. I know. I know. I know.

Oct 1850

Sunday Sept 16

Bill & Evelyn drove us up to the place in Virginia. Found everything all right at the shack though the ice was on the lake!

I planted the wood lily bulbs brought from Osage on the hill close to the shack, and the Canada lilies beside the swamp clearing beside Bull-neck to the south of the irises

Also scattered seeds of *S. rubra* lady-slipper near those I have transplanted beneath the pine.

Went to scats and found them both fairly well

Sunday

Oct. 7, 1928

We drove up to Kalama crest
in the afternoon and Eva, Evelyn
the Fadder and I went over
to Prospect Rock.

Foliage in good color, and
little has fallen. Noted that
the hickories with the side vein-
ings still green, the rest of
the leaf a bright yellow,
were particularly brilliant.
A good crop of walnuts,
hickory nuts, and acorns.

Gathered some hickory nuts
on the ridge near Prospect
Rock. It was nearly
dark when we got back
to the shack.

Took Photos at and from the
ledge at Prospect rock

Sunday Oct 14, 1928

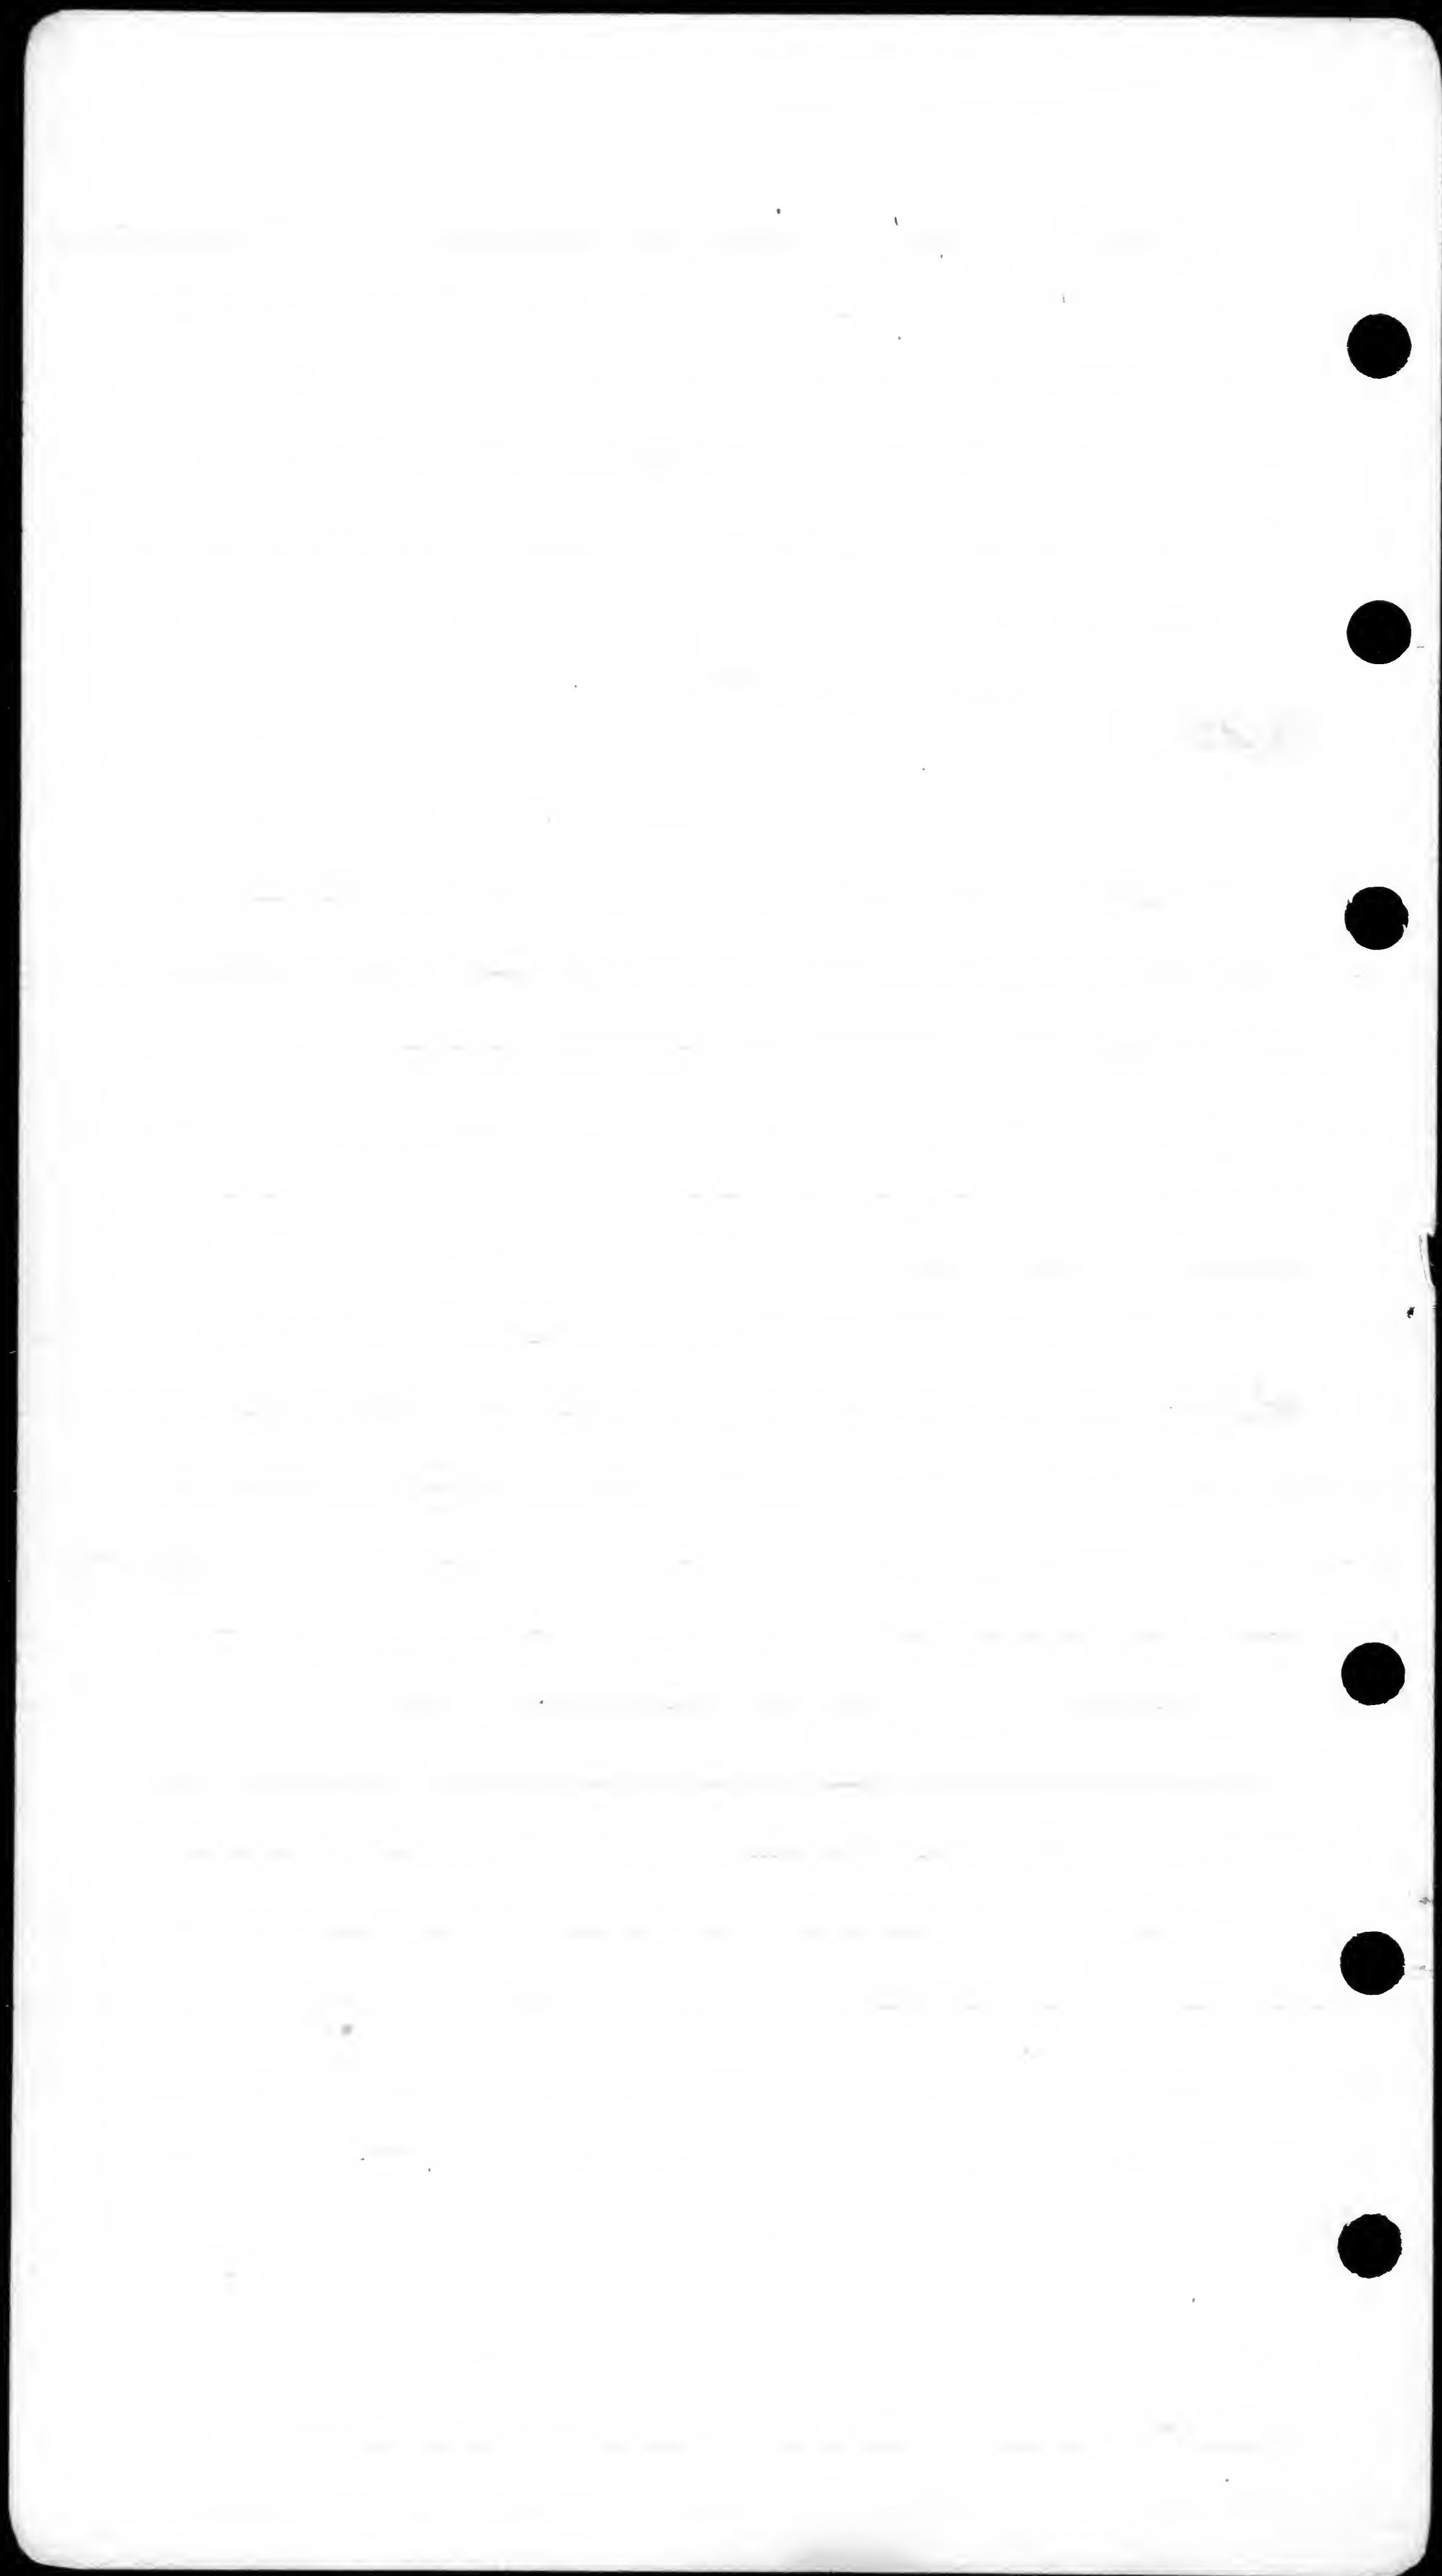

We drove out to Clifton Sta. Va. in the new car. Got to the Richards about 1:30 and after eating lunch in the orchard drove to the Doaks. Where we met Mr & Mrs Doak, and Catharine, Hazel. Sam and

They are all interested in nature and wild life and have made a refuge of their farm of about 400 acres. They raise goats, sheep, and all kinds of poultry.

We took a walk down to Bull Run to the same point where I went with Dr Wetmore a couple of summers ago.

The day was overcast and just comfortable, and the autumn woods were glorious.

We left about dusk, and got home in good time.

Washington DC

To Wake Forest NC

Nov 17. We left at 840

Eva Bill & myself. Went
by way of Fredericksburg. Had
lunch in the woods a few
miles N of Richmond, among
the long leaf pines which
were being cut for pulpwood
and were stacked in piles

peeled, for drying.
We called on Ted Tom
Newalls at Richmond for
a half hour or so then
went on by Petersburg and
Henderson. We stopped at
Wake Forest a college
town.

Nov 18 To Lake City, S.C.

We left about 8:30 and drove
through Raleigh, Monroe,
Samford, Vass, Southern
Pines, Aberdeen, Rockingham.
There was an extensive
swamp below Aberdeen
where we got out
and gathered a few
shrubs.
Smiley

At
the
Lake
City
Hotel,
we had dinner at
Rockingham and beyond
and arrived at the hotel
into A.C. At Society Hall
we took the road to the
south and soon went
through Darlington and
Florence and after
some delays got
to Lake City where
we stopped for the
night.

In the valley of the
Peenedee there were signs
of a flood that had
overwhelmed all the fields
to a depth of 3 or 4 feet

Nov. 19 . . To Charleston
We left Lake City and
drove south. Had a few
miles of muddy road and
then crossed the Santa
River on a long bridge
and causeway full
The Santa is a broad
muddy stream with
some swamps of cypress
All the country south of Lake
City is full of Spanish moss
about festoons many
the brush, cypress, pines,
oaks many live oaks
It is exceedingly picturesque
and adds a charm to the
swamps which I have
never seen surpassed
I took some pictures
We got on to Charleston
about 11:30. Got located
at 3 Lamboll St and
went out to get some
lunch.

While looking around for
a place we ran on to
the Horrells.

After lunch we went to
the museum, and then drove
out to Beach where
we drove on the sands. There
are quite extensive groves
of Palmetto on the Ocean
front. Back from the shore
the woods are thick with
shrubs and vines, much
live oak. Pines etc

In the evening at 8. The business
meeting was held in the Francis
Marion Hotel. The usual
routine of reports of Committees
election of honorary fellows
and members was gone
through. As there were many
more candidates for members
than the five who could be
elected there was much
debate and numerous ballots
the meeting did not adjourn
until after 12 o'clock

Tuesday, Nov 20

Charleston S.C.

Meeting began at 10 am
and we had a good lot of
papers.

In the afternoon a large
party drove out into
the country. To Middleton
Gardens. Summerville
and a club where tea
was. Planted along the
paths in the yellow pines
here we saw myrtle warblers
Kinglets, Nuthatches and
red-cockaded woodpeckers.
We went at dusk to an
old church which still
held to the old Church of
England ritual.

Snowy herons

Shrike

Mockingbird

In the evening we had
some papers at St John's Church

Charleston

Wednesday Nov 21

Papers in the Forenoon
and Afternoon

In the paper by Rogers he
spoke of the great abundance
of shorebirds on certain islands
in the Zuyder Zee Holland.
The danger of judging the abundance
of certain birds by isolated ob-
servations occurred to me. In
many cases condensation in other
parts of the country will cause
a great concentration in others.

In the evening we had the
annual banquet and
heard the Society for the
Preservation of Negro Spirituals.
There was also a trip to
several of the old residences
including the Duncan and the
Williams homes.

The young of the Goldfinch
are predominantly on the seeds
of Eragrostis
old ones eat plant lice and
their eggs. (but mainly seeds)

Thursday Nov 22

T. S. Roberts

In afternoon the session
was held at the High
School.

Allen on Game Investigation

Chapman on N Shore Gulf
St. Lawrence, Forties
Fish Hooks etc.

Stoddard on various birds
of southern swamps

Swarth on Galapagos Is

Pearson on Educational work
of Nat. Assoc. Aud. Soc.

He spoke of not asking young
people to pledge themselves
not to kill birds. He thought
that they should be taught to
love birds and then they
would be protected and
such measures would result
that then would be plenty
for those who found
recreation in shooting.
The desire to kill had descended
to us from our ancestors and
he advocated giving a
boy a gun and telling him to hunt

Arthur Allen spoke of grouse
breeding but said I shot
them were still running
wild about problems connected
with it. Of 25 found
under artificial conditions
all but one died after
being raised to nearly
adult stage. These birds
hatched a brood from
eggs laid by wild
birds.

The young fly at about
three weeks.

In a brood of 15 or 20 across
where a careful census of
the grouse was taken there
were found 22 birds.
There was some hunting
on the area, and at its
close only 2 could
be found. The hunting
had been of such a
character that it was
thought that some other
agency had caused the
mortality, but a careful
study showed that the
twenty birds had all
been killed by gunners.

Friday Nov 23

To Se Green Island
we left the dock
shortly after 7 o'clock
and went out among the
low islands of the Harbor

Saw
H Gull
R B Gull
L Gull
Kingfisher
Marsh Hawk
Gt Blue Heron
L Blue Heron
Caspian Tern
B-B Plover

Audubon
Meadowlark
S C Wren
Hermit Thrush
Brown Creeper

Took nearly 2 rolls of
film

Saturday Nov 24, 1928

Lebanon to Wilmington

We left about 10 o'clock
and went north cross
Cane Creek and the Santee
and went through Kershaw
to Florence, crossing
with much long-leaved
pines, with gum and cypress
in the swamps and much
Spanish moss. About
Florence we were out
of the Spanish moss.

We turned eastward from
Florence and soon crossed
the Pee Dee a deep wide
stream here as elsewhere
bearing the marks of some
floods. Later we passed
the little Pee Dee, and the
tributary the Lumber, the latter
a dark clear stream.

The road was said to be
of latting concrete. Had
to ferry the Cape Fear River
at Wilmington.

There were many swamps
with no roads but many
some few stands of
cypress. Found many Lilacs
Some about 25 black vultures about
a dead dog near Mt Holly.
Got rooms at the Brunswick.

Sunday Nov 25
Wilmington to Portsmouth

Left about 8:20 and took the
road to New Bern. Washington,
Lumberton, Edenton, Elizabeth
City, Wallaceton and Portsmouth
were put up at the Monroes.

We saw a Screeper / Sparrow
hawk near Lumberton

Took a black heron, a blue
heron, a blue plover
Myricea carolinensis near
Williamston, N.C.

Magnolia grandiflora in swamps
near Washington -
Live oak near Elizabeth City

Spanish moss in valley
of Roanoke River

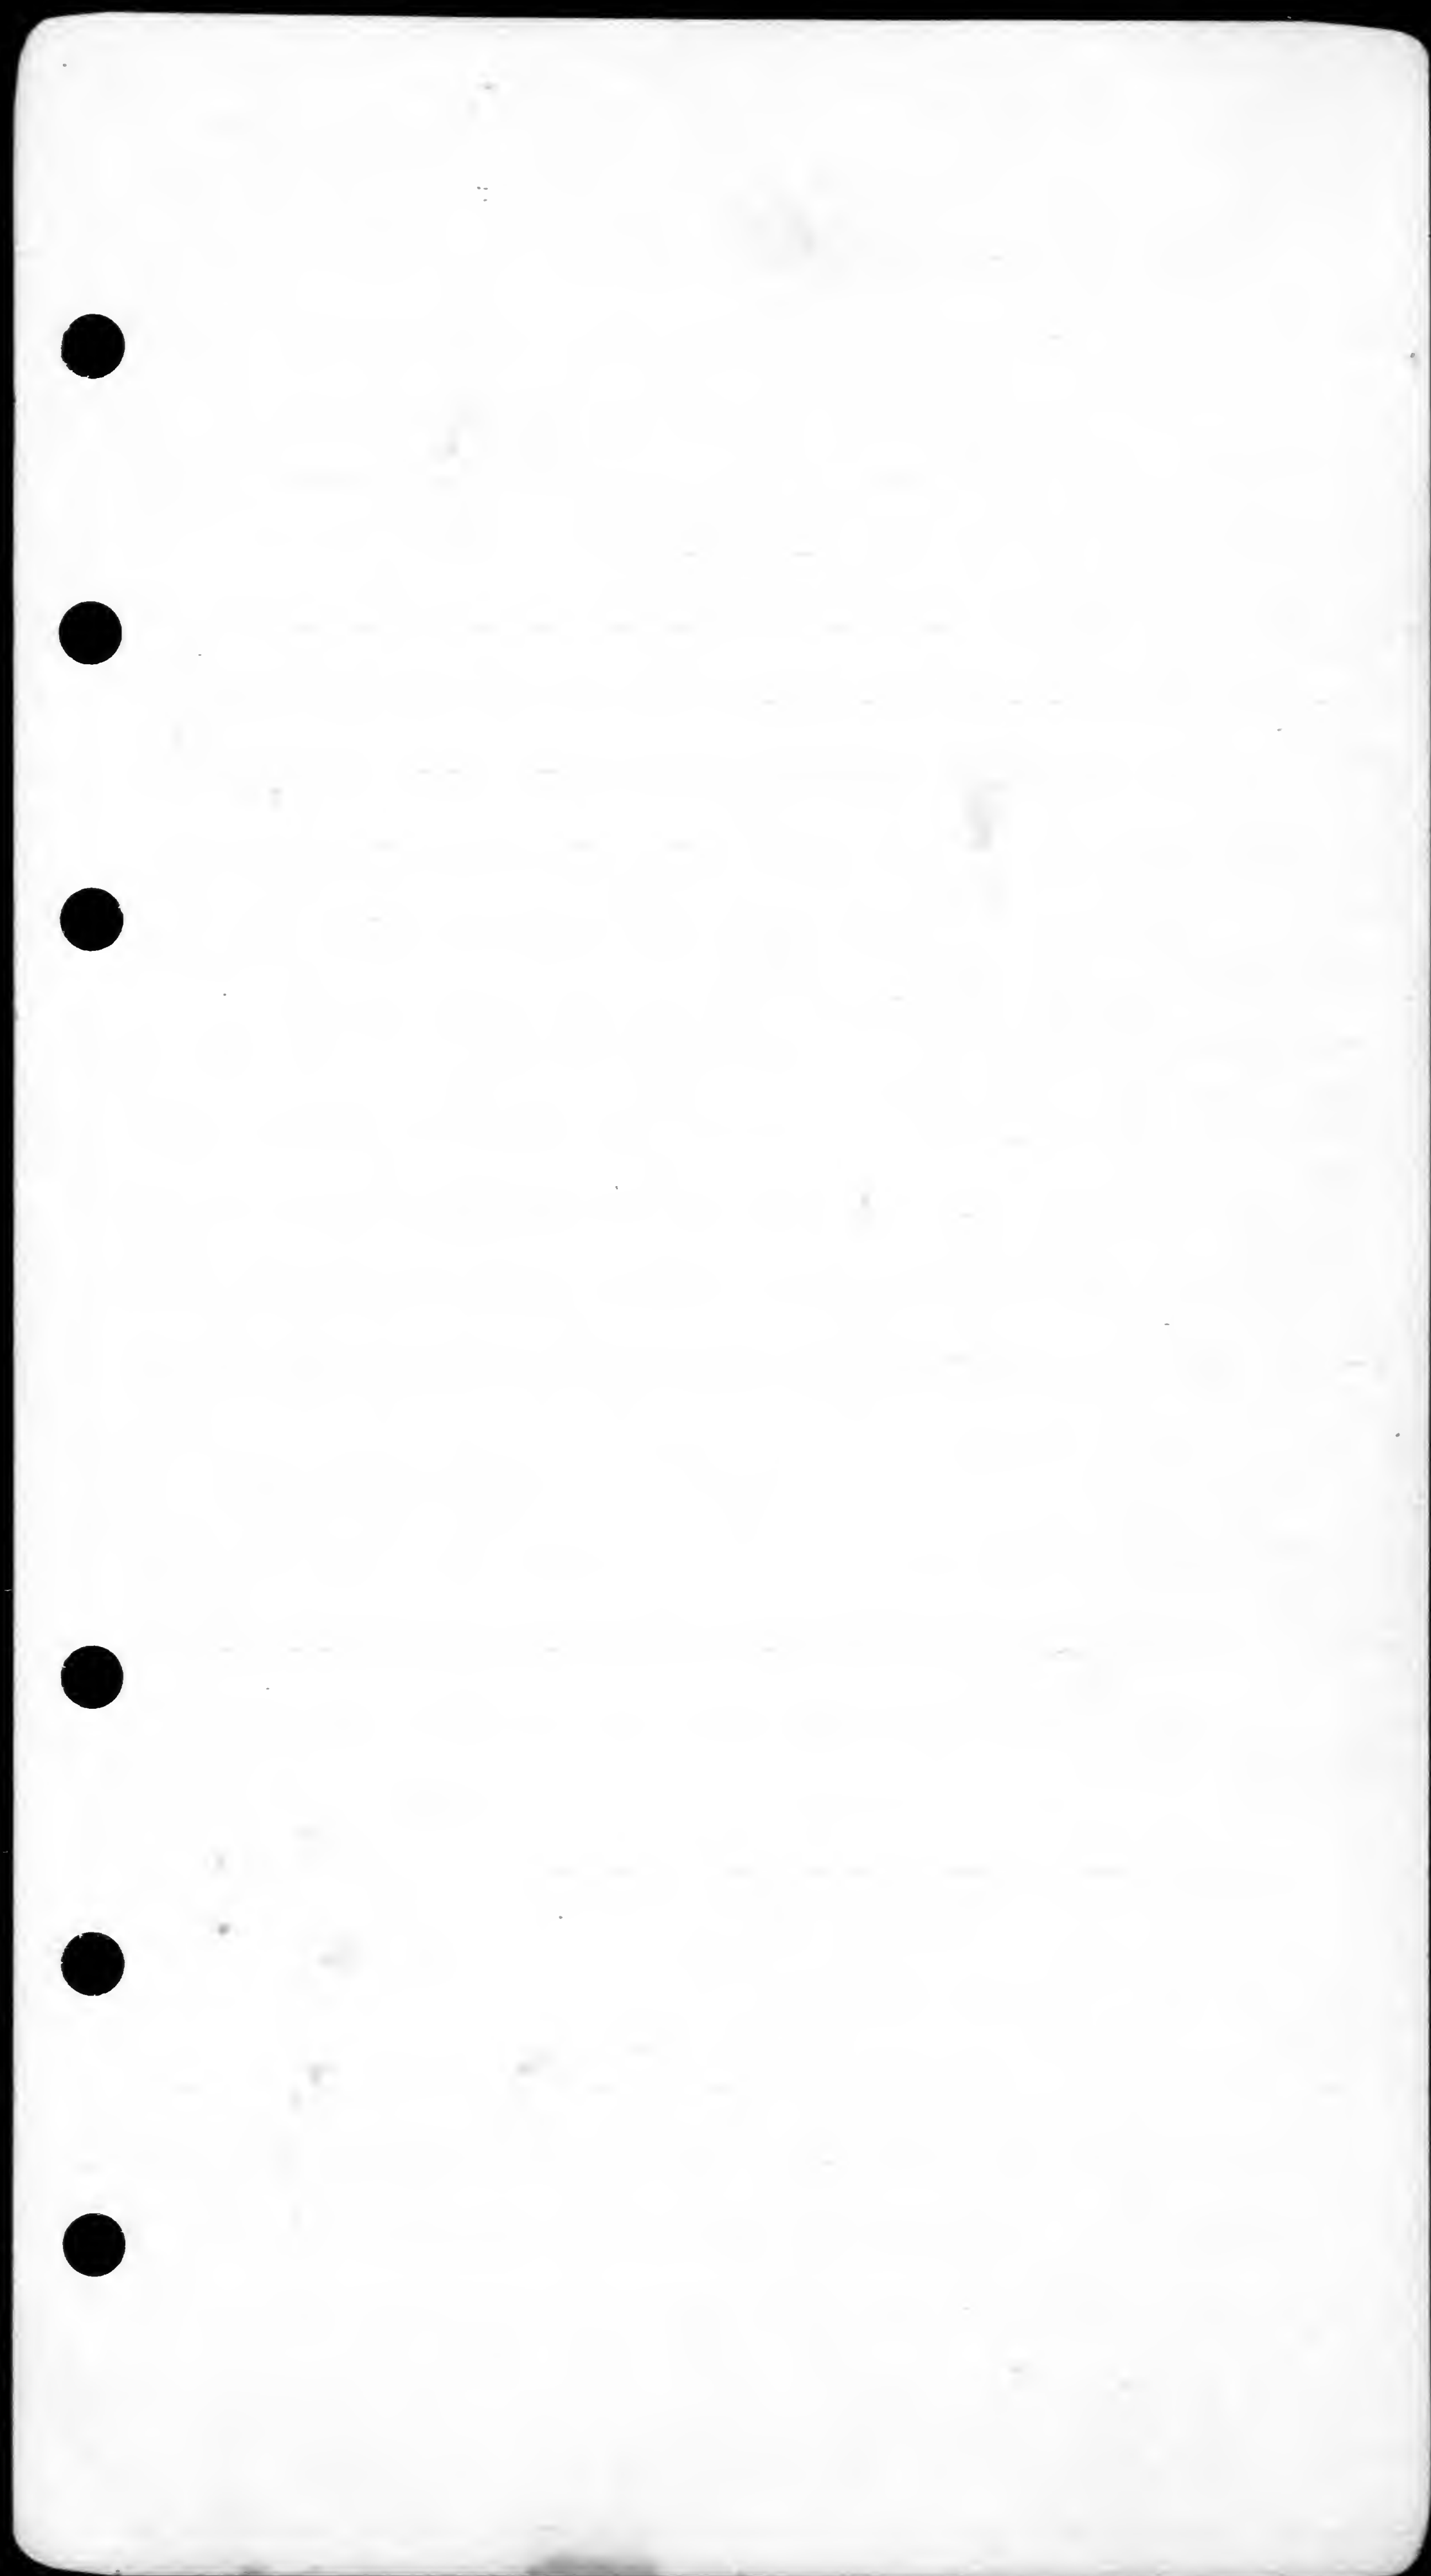

From Elizabeth City we went
up across the Pasquotank River
at South Mills and followed
the Canal N. past Wallaceton
to Portsmouth

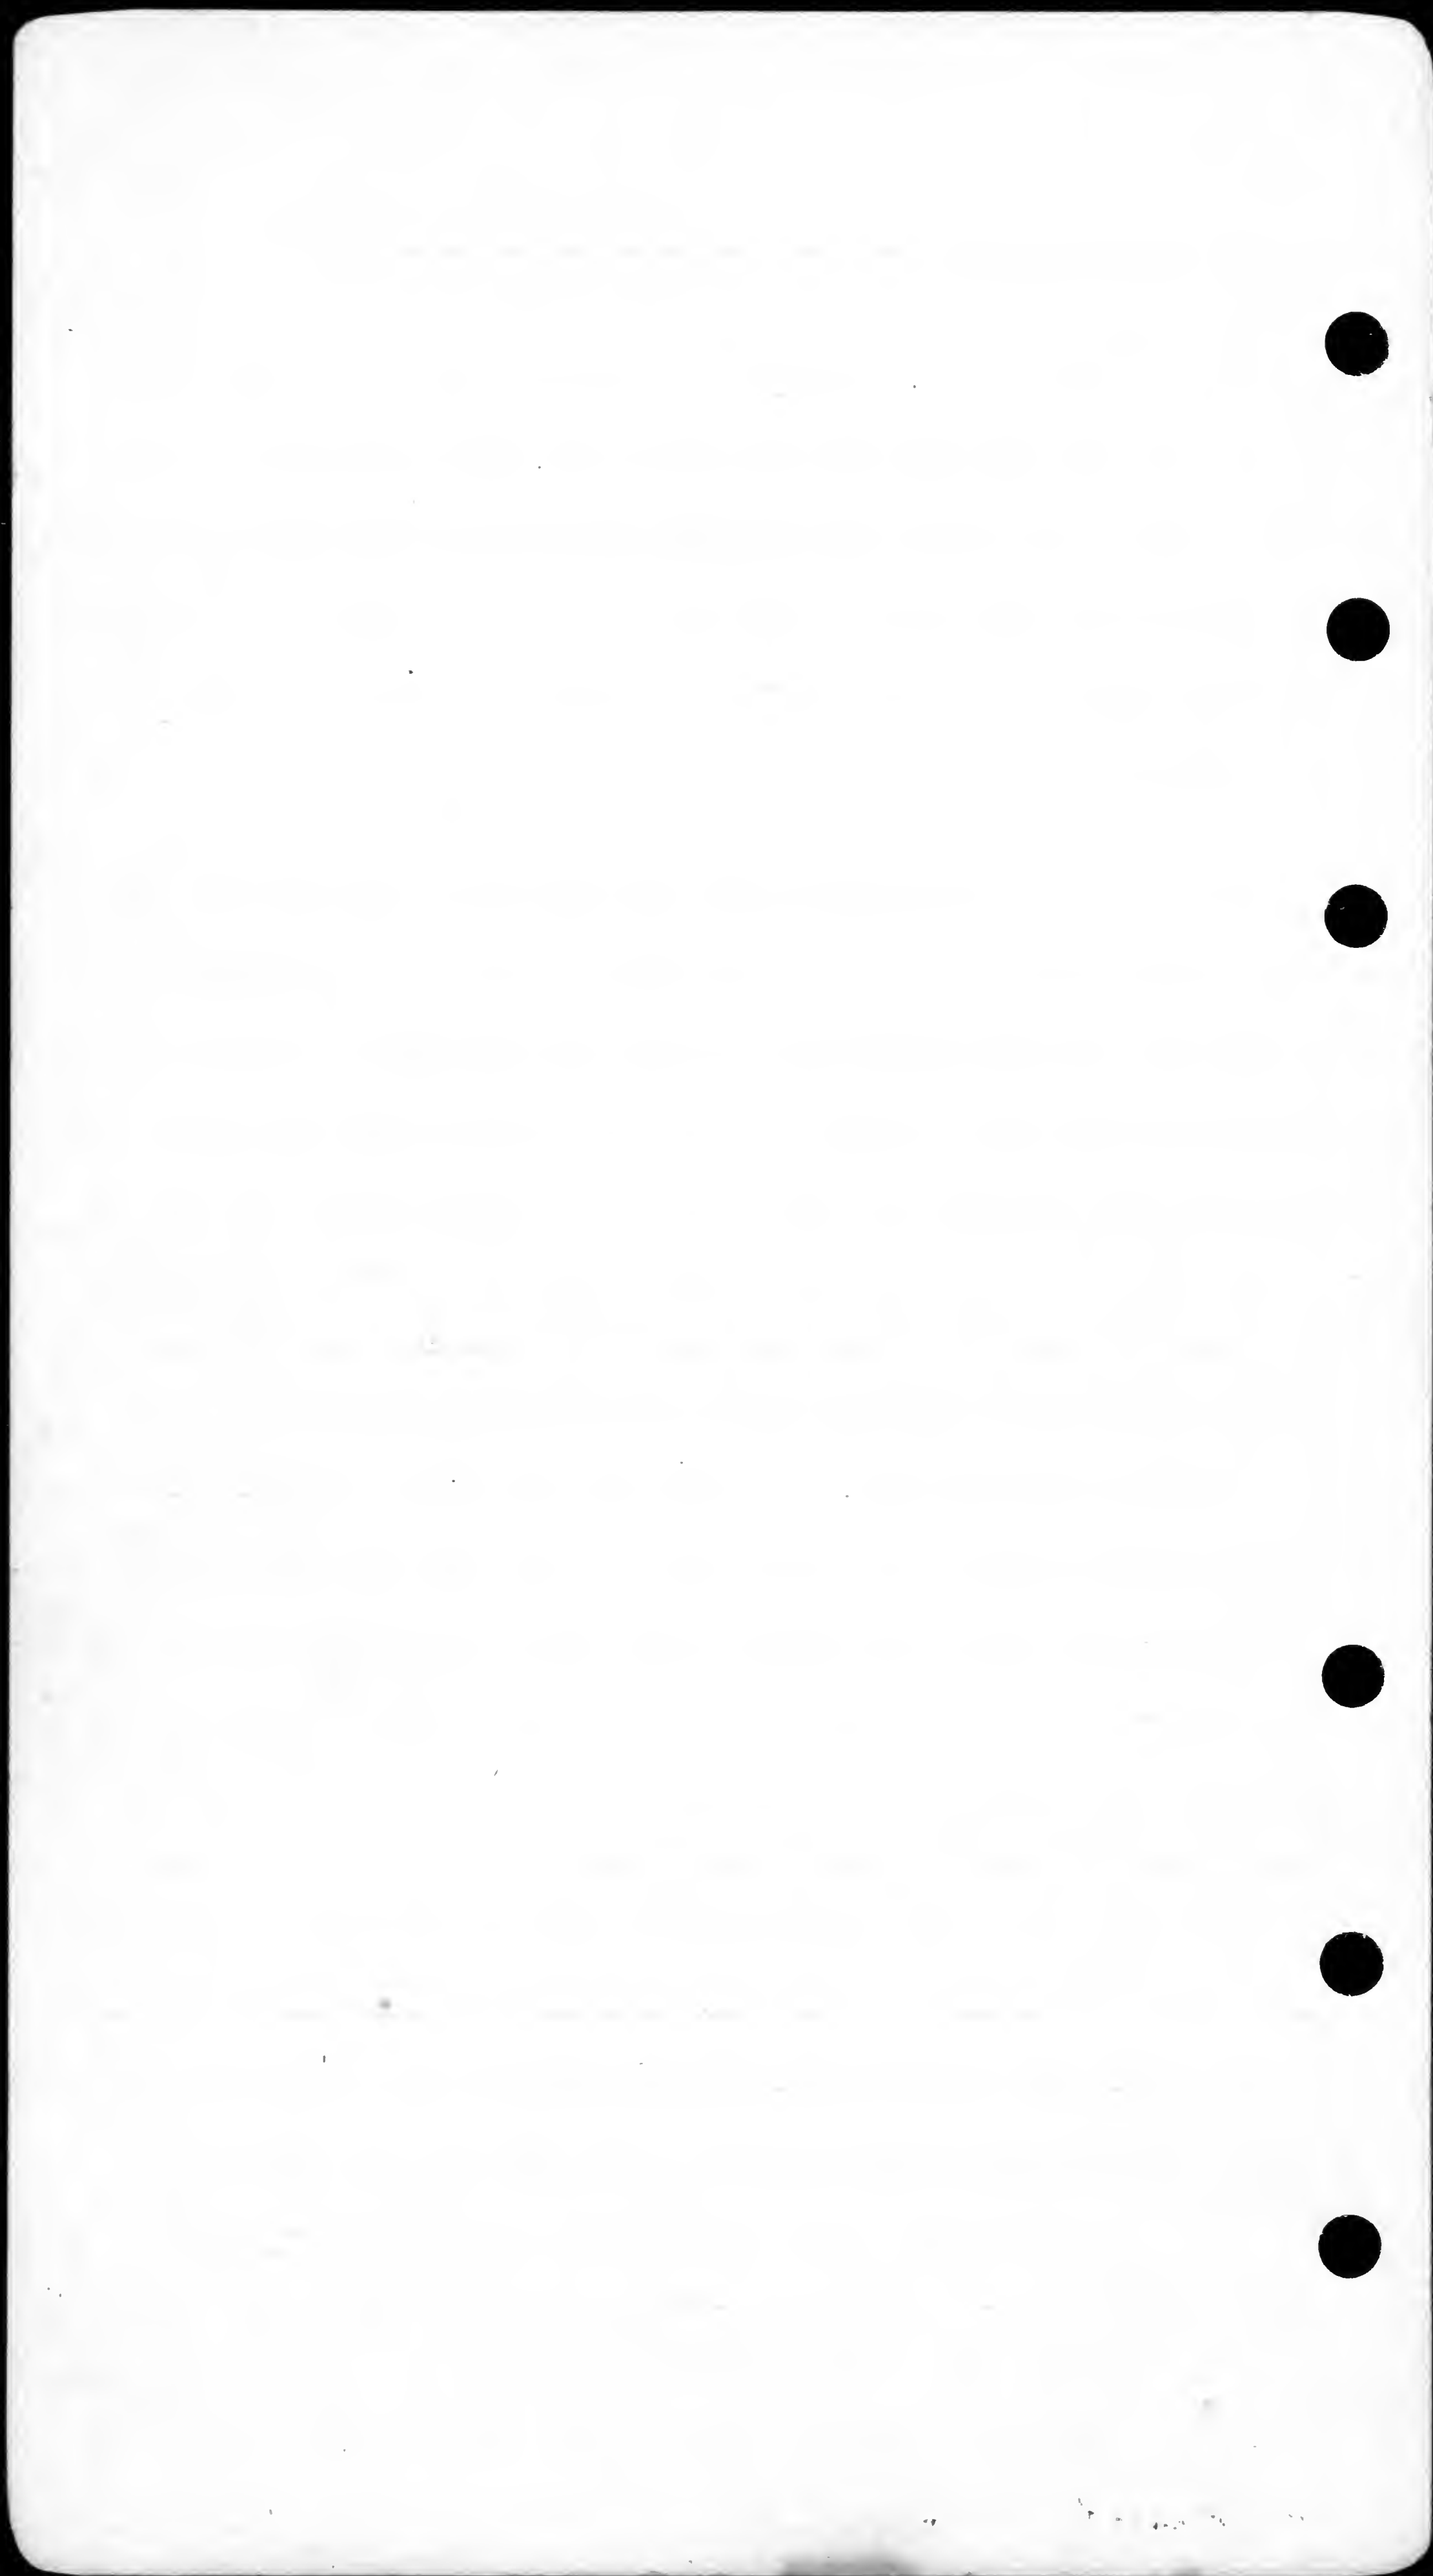

Red-shanked Hawk near Wallaceton

Monday Nov 26.

Portsmouth to Washington

We left at 8.15 and took
the road to Suffolk along
the N end of the Acornal Swamp
and to Franklin, Petersburg
and Richmond. Then we
went out about 2 1/2 to the
Methodist Orphanage, which
is on the site of the Lynham
Farm, where Mrs P. and the
rest were born. Had lunch
in a little joint at Richmond.
Then we went on and
got home about 5.30.
Found everything ok

Dec 6. 1928.

Washington St

attended the open session of the
advisory board at the Cosmos Club.
Those were present of the Board
the following. Pearson, Forbush -

W.C. Adams Burnham, Brock Anderson

Clapp W.S. Finley, Clark McAdams

Marshall McLean, T.N. Marlowe Lee Miller

Dunn, Rathbun, R.E. Palmer

H.F. Stone, formerly of the Biological
Survey advocated a short
open season on all shorebirds
on the ground that they had
increased.

Adams, Forbush and Pearson
spoke briefly against this.
Stone in answer to a question
said that the original ban on
shorebirds was not necessary.
Mudsen says that there
seemed to be more shorebirds
than at any time since 1909 but
did not advocate an open
season on them.

Judge Erwin spoke on the
open season on doves in
Alabama, especially for
southern Alabama. He said
that it was too hot in September
to hunt doves, or for them to

Keep and that many have young
in the nest. The Conservation
League of Alabama reported
that large numbers of doves
about Anderson and
~~Birmingham~~^{Birmingham} have eggs in
September, and that they
have been much reduced during
last two years. Because men
would stop shooting when limit
is reached. was willing to give
up all dove shooting prior to
Nov. 1. partly to save quail

Bag limits never much observed
in Alabama.

Also quite a lot of killing out
of season. but more bag-limit
violations than of season

Twitty of Georgia wished split season
for doves in his state. depended
largely on the judgment of an
ornithologist of Ga. a Methodist
minister named Dr. Wallace Rogers
and this man is of the opinion
that the amount of breeding of
doves in September is not enough
to be considered. Twitty said
he considered that such a
matter should be considered

from the standpoint of General conservation, (whatever he means by that), and not from the standpoint of any particular bird.

I wish to read the two 1000 letters endorsing the split season on doves for Georgia.

Pearson added his testimony to that of the Killers by saying that in Ohio fresh eggs had been found every month of the year, ^{except one} and that he ~~thought~~ ^{thought} ~~did not~~ ^{thought} ~~think~~ ~~the~~ ~~amount~~ ~~of~~ ~~breeding~~ ~~in~~ ~~September~~ ~~to be~~ ~~negligible~~ if there was to be a season when no young would be found it would be an extremely short season

In Bull Am Game Prot Assoc. as
reported in Field and Stream
Dec. 1928 p. 8. on the split
season on doves.

"Some criticism has been made
on account of opening the dove
season as early as September 1."
Pa & N.J. want open season

Dec 13. 1928.

Palm tells me that he has started a movement in the State Department so that Consuls will be instructed to call attention to proposed shipment of wild species in any shape or parts, or products of them, which have been taken contrary to the laws of the various countries, or whose export is prohibited and is trying to get this principle recognized in the Tariff Act.
